A-SMART[®] CARTS + AREA SALES REP = <u>SATISFIED CUSTOMER</u> A-SMART ADVANTAGE

CONSIDER THESE VALUE ADDED SERVICES

Before You Make A Longterm Investment

Armstrong Medical Offers:

- Nationwide coverage (over 40 Sales Representatives)
- Pre-sale support

- Delivery support
- Post-sale support
- The Best Overall Value Around

FEATURES OF A-SMART[®] PREMIER[™] ALUMINUM CART

- ALUMINUM Carts are 45% lighter than Steel
- Full Extension Ball Bearing Drawer Slides Ensures that your drawers will open and close smoothly every time.
- Quality Aluminum Construction One-piece outer shell construction providing you with added strength and stability. Locking components consist of zinc plated and galvanized parts.
- Double Side-Wall Construction Armstrong's A-SMART[®] Carts offer you the added protection of our double side-wall construction. The outer wall adds an extra layer of protection to ensure that your drawers, attached to the inner wall, will always slide smoothly.
- Two Interchangeable Locking Systems
- **Customize Your Locking Configuration** Lock individual drawers, double lock drawers, use multiple types of locks on the same cart.
- Slide-Thru Side Shelf

- Contour-Fit Plastic Top
- Four Vertical Aluminum Corner Mounting Tracks

For easy accessory attachment (eliminates the need for holes).

- **Stabilizing Frame With Bumper** Casters are moved out from underneath to the outside of the cart. This extra wide base provides your cart with added stability.
- 18 Colors Available

Allows you flexibility in your carts appearance. Choose colors to specify department or function, or even use multiple colors on the same cart to differentiate drawers.

• Highest Quality Swivel Casters (two locking, one tracking) Quiet, durable, German-made casters. Smoother, easier maneuvering.

A-SMART[®] Carts Are Made In The USA

Broselow® Pediatric Resuscitation System

Broselow® Pediatric Resuscitation System

Broselow® Pediatric Resuscitation System

AE-4700 Broselow® Pediatric Resuscitation System, \$1,950.00

Includes twenty-eight size-specific procedural modules in seven pouches, flying carpet, Broselow[®] Pediatric Emergency Tape, and all other equipment shown at left. All contained in a heavy-duty ALS equipment organizer. The Broselow[®] Pediatric Resuscitation System is approved for the PALS education program. For children 3 to 36 kg.

NEW Broselow[®] Pediatric Emergency Tape "2019 Edition" mL units listed.

AE-4800 Broselow® Pediatric Emergency Tape, 5/pkg., \$120.00

The 2019 version of the Broselow Reference Tape will be compliant with the most current PALS Standards

- Pre-calculated doses in milligrams, as well as all doses in pre-calculated ml, making the entire process error free by removing the need for any calculations.
- The new tape will accommodate for obesity by allowing for a habitus adjustment if deemed appropriate to the tape weight estimation.

1. Measure

Measure the child with the Broselow[®] Tape. This gives you an accurate weight estimate, equipment sizes, and drug dosages.

2. Treat

Reach into the bag for exactly the right equipment for I.V., intubation, O_2 delivery, or intraosseous access. There's no guessing.

Updated Epinephrine Nomenclature.

Broselow® Emergency Equipment Organizers

AE-4825 Mini Broselow[®] Equipment Organizer, \$265.00 Seven empty color-coded bags permanently attached to "Flying Carpet" cloth.

Main bag: 15"L x 10"H x 6¹/2"D. Pouches: 12"L x 5"H x 2"D Flying Carpet: 30"L x 12"W

AE-4805 Broselow[®] Pediatric Emergency Equipment Organizer, \$450.00

Seven empty color-coded bags attached to Velcro[®] "Flying Carpet" cloth. Includes airway management equipment bag.

Main bag: 18"L x $11^{1}/2$ "H x $12^{1}/2$ "D. Airway bag: 14"L x 9"H x $4^{1}/2$ "D empty. Pouches: 14"L x 8"W.

STOCK YOUR CART

Fill the drawers with the Broselow[®] Pediatric Resuscitation System, size-specific pediatric equipment for a complete resuscitation system.

AE-4712 Procedural Modules, \$975.00

A complete set of twenty-eight modules for the seven Broselow[®] Color Packs or the Broselow[®] ColorCode[™] Cart.

Modules for Intraosseous Access, O₂ Delivery, Intubation, and I.V. Delivery.

AE-4703 Equipment Pack, \$695.00

Contains all the equipment that comes in the original Broselow[®] bag: two disposable manual resuscitators, four cuff masks, three disposable blood pressure cuffs, one gauge, two Magill forceps, and two Vital View II[™] LED fiber optic laryngoscope handles.

Cart Accessories, pages 44-55

Restock Only The Accessed Drawers. Save Money. Save Time.

Don't waste money checking crash cart drawers that haven't even been opened. With A-SMART[®] Premier[™] Carts, individual drawer seals can be arranged so that only the accessed drawers need to be checked for inventory, a small investment that pays off with every use.

- Double lock medication drawers
- Improve equipment security
- Ready for changing needs

When carts are shared by departments or personnel, A-SMART Premier's locking options allow each to be locked with a separate key. Never wonder about who else has access to your equipment.

Maybe you don't need this kind of flexibility now, but you might later. With A-SMART Premier, you can update your locking system at any time. Need to change a mobile workstation into a crash cart? No problem. Need to add a key lock to an existing cart? Done. Only A-SMART Premier offers you that kind of flexibility.

Locks may be placed on either corner glide for flexible security. *Double locking* drawers can help control inventory and access.

Auto-Locking Storage Cabinets

On-Wall Auto-Locking Storage Cabinet

NEW Auto-Locking In-Room Storage Cabinets

call for more information

These Auto-Locking Storage Cabinets are perfect for extra security of items inside patients' rooms or nurses stations. With this cabinet, you get all the great locking features of our Auto-Locking Carts. Choose from in-wall or on-wall cabinets. Cabinets are made of 18 guage cold rolled steel with 16 guage aluminum doors. Both models come with two separate storage areas, each with its own individual auto-lock and key override. Customized dimensions and colors are available. Cabinets shown are approximately 28.44"H x 3.83"D x 22.60"W. Call customer service for more details.

- Minimum order of 25
- Master code for all programming
- Access code for normal, daily use
- Up to 250 user codes possible
- Manual or automatic locking

- Auto-Lock Timer can be set from 1 to 998 minutes, or it can be shut off so that the cabinet never auto-locks
- Auto-Lock Timer programming can be limited to master code only
- Battery operated; never needs to be plugged into an outlet
- "Low Battery" indicator light
- Manual key override for emergency access

*Please note: we suggest using alcohol only for cleaning the electronic keypad surface. Please completely dry keypad and surrounding area after alcohol application.

Electronic Push-Button ClearView[™] Security Drugbox

see page 46

Prices and products are subject to change without notice.

Security Box and Trellis Systems

ClearView Security[™] Drug Box and Shelf

ACV-1EL Electronic Push-Button ClearView Security Drug Box with Key Override (manual locking), \$450.00 CVS-1 ClearView Shelf, \$90.00 ACV-1T ClearView Blue Tray, \$19.00

ACV-1EL

The ClearView provides a great way to secure your medications, small equipment, patients' personal valuables, RSI equipment, and so much more. The ClearView also allows for a clear view of your inventory and also allows for anesthesia cases to be set up in advance while still keeping instruments/drugs secure. The ClearView can be mounted to a wall, in a patient's room, or even on an A-SMART[®] Cart.

Features:

- Supervisor code for all programming
- User code for daily use (19 user codes available)
- Manual key override for emergency access
- Codes must be 4-8 digits in length
- Natural HDPE cabinet with clear PVC door
- Corrosion-resistant
- Uses Alkaline batteries

Dimensions: 7¹/2"W x 14"D x 7³/8"H **Weight:** 5 lbs

NOTE: No auto-locking features (control knob must be turned manually to lock and unlock).

To clean, apply non-acid based cleaner to a clean cotton cloth, do not spray directly on lock. Wipe down keypad and its respective housing surfaces of excess cleaner.

For optimal performance, it is recommended the batteries be replaced on an annual basis.

Attach the ClearView Security Drug Box to an A-SMART[®] Cart with the CVS-1 ClearView Side Shelf.

Tilt Bin Organizers

Tilt Bin Organizers Maximize Storage

Tilt Bins Organizers

Designed for modular assembly, Tilt Bins organize supplies to match your needs. Clear Tilt Bins leave stock visible for quick identification, yet are securely arranged.

Each bin has a slot for labeling and swings open for easy access. Bins are removable for cleaning or refilling.

NOTE: A Trellis Rail System or Shelving Unit (except ACD-1N, PCD-1, PLS-1, and ALS-1) is required to mount Tilt Bins to an A-SMART Cart. See page 46 for Trellis Rail Systems and page 50 for Shelving Units. **ATB-6X Six-Bin Unit, \$30.00** Each bin measures: $4^{1/2}$ "H x $5^{1/4}$ "D

ATB-5X Five-Bin Unit, \$35.00 Each bin measures: $6^{1/2}$ "H x $5^{1/4}$ "D

ATB-4X Four-Bin Unit, \$50.00 Each bin measures: 8¹/8"H x 6⁵/8"D

ATB-3X Three-Bin Unit, \$65.00

Each bin measures: $9^{1/2}$ "H x $7^{3/4}$ "D Each Tilt Bin Organizer has a total width of $22^{1/2}$ ".

All products are compatible with both Standard and Premier[™] Carts unless otherwise stated.

A combination of bin sizes can be used to accommodate multiple-sized supplies or equipment.

Need More Organization For All Your Supplies? See pages 52-54.

Lockable Tilt Bin Organizers

NOTE: A Trellis Rail System or Shelving Unit (except ACD-1N, PCD-1, PLS-2, and ALS-2) is required to mount Tilt Bins to an A-SMART Cart. See page 46 for Trellis Rail Systems and page 50 for Shelving Units. Accessories (including Lockable Tilt Bins) can't be mounted directly above Lockable Tilt Bins.

- Dual-wheel, non-marring polyurethane casters resist movement when the seat is unoccupied

Foot-activated Pneumatic Stool

AC-925 Foot-activated Pneumatic Stool, Naugahyde™, \$550.00 Hands-free Height Adjustment

AC-920 Hand-activated Pneumatic Stool, Naugahyde™, \$395.00

- Seat height adjusts from 22" to 29"
- Seat is 16" diameter x $2^{1}/2^{"}$ thick
- Foot control mechanism, located under the chair's base, is easy to operate with the press of a heel; helps keep hands free for maintaining sterile conditions
- High-resilient foam seat padding with vinyl upholstery creates a

comfortable and durable stool for all healthcare providers

• Non-chip, chrome plating and bumper guard seat make for a long-lasting, quality investment

AC-924 Foot-activated Pneumatic Stool, \$535.00

Same as AC-925 except seat adjusts from 18" to 23".

Anesthesia Chairs

When Comfort Is Not Optional

Armstrong Anesthesia Chairs Are MADE IN THE USA!

AC-985 Anesthesia Chair, Black, Non-conductive, Naugahyde™, \$720.00 AC-985A Anesthesia Chair with Arms, Black, Non-conductive, Naugahyde™, \$810.00

Body frame support:

- ✓ Ergonomically designed
- \checkmark Balances work posture and weight support
- ✓ Reduces seat slippage
- \checkmark Eliminates pressure on the coccyx
- ✓ Adjustable back/lumbar support (15¹/2"W x 14¹/2"H)

Custom fit adjustment:

- ✓ Six-way seat control with high-density, foam seat (18¹/2"W x 17"D x 3" Thickness)
- ✓ Free-floating, articulating seat control with more adjustment options
- ✓ Height adjustable seat (22" 32") and foot ring (20" Diameter)
- ✓ Five-leg, cast aluminum base with 25" leg spread
- ✓ Dual-wheel safety casters prevent chair kick out
- ✓ Optional armrests with width and height adjustment

Long-lasting value:

- ✓ Full lifetime warranty on pneumatic mechanism (13 year on balance of components)
- ✓ Bumper guards to protect against damage to the vinyl upholstery
- ✓ Polished, chrome plating

ClearView Security[™] Drug Box

ACV-1EL Electronic Push-Button ClearView Security Drug Box with Key Override (manual locking), \$450.00 CVS-1 ClearView Shelf, \$85.00 ACV-1T ClearView Blue Tray, \$19.00

ACV-1T ClearView Blue Tray, \$19.00

The ClearView provides a great way to secure your medications, small equipment, patients' personal valuables, RSI equipment, and so much more. The ClearView also allows for a clear view of your inventory and also allows for anesthesia cases to be set up in advance while still keeping instruments/drugs secure. The ClearView can be mounted to a wall, in a patient's room, or even on an A-SMART[®] Cart.

For maintenance instructions, see page 46.

Features:

- Supervisor code for all programming
- User code for daily use (19 user codes available)
- Manual key override for emergency access
- Codes must be 4-8 digits in length
- Natural HDPE cabinet with clear PVC door
- Corrosion-resistant
- Uses Alkaline batteries

Dimensions: 7¹/2"W x 14"D x 7³/8"H **Weight:** 5 lbs

NOTE: No auto-locking features (control knob must be turned manually to lock and unlock).

SSCOR[®] DUET[™] Portable Suction

Powerful Yet Gentle Portable Aspirator

Airflow >30 lpm At The TIP Of The Catheter Vacuum Adjustable <50mmHg - >525mmHg

AC Suction with Battery Back4-up

AE-6975 SSCOR[®] DUET[™] AC/Battery-Powered Suction Unit with Built-in Automatic Battery Care and Protection, \$1,045.00 AE-6976 SSCOR[®] DUET[™] AC/Battery-Powered Suction Unit with Retention Bracket (mountable on carts or walls), \$1,185.00

The Duet is perfect for hospital crash carts, patient transport, surgi-center backup, long term care facilities and more.

- An AC suction unit with battery back-up, the Duet provides instant, powerful suction whether or not AC power is available.
- Built-in charger maintains battery and will not overcharge. Keep it plugged in at all times for maximum battery health.
- 3 year battery replacement policy for properly cared for devices!
- When fully charged, the sealed lead acid battery provides 45 minutes +/-10% of suctioning power, giving you the suction you need for emergency care procedures.

- Battery condition indicator.
- 1200cc Bemis canister included.
- Pump Airflow: Approximately 50 lpm.
- Clinical Airflow: 30+ lpm (achieved at tip of patient tubing).
- Size: 17"L x 9"H x 6"W; weighs 10.5 lbs.
- Battery Type: Sealed lead acid.

Flat back unit sits conveniently on a cart or shelf. Bracket back unit will attach to the side of the cart or to a wall saving valuable shelf and cart top space.

Premier Panel (Retention Bracket not included),

ETL listed, conforms to UL STD 2601-1, 2nd Ed. Conforms to IEC 60601-1 and EN 60601-1-2, and Certified to CAN/CSA STD C22.2 NO. 601.1-M90

Prices and products are subject to change without notice.

SSCOR® Portable Suction

SSCOR[®] DCell Suction[™]

AE-6800 DCell Suction, \$1,250.00

The DCell Suction is the industry's first and only suction device powered by off-the-shelf D Cell alkaline batteries. Designed for the hospital and medical disaster management sectors, this unique feature allows the DCell Suction to provide high quality, continuous medical vacuum without the need to recharge. After depletion, batteries can be changed in minutes, making the DCell Suction's run time almost indefinite. The DCell Suction is ideal to have for disaster management caches and stockpiles. With alkaline D Cell batteries that carry a long shelf life, this unit can be stored for extended periods of time and deployed to provide hours of suctioning time when needed.

Specifications:

12"H X 9" W X 11"D

Weight: 9.5 lbs. with batteries installed

Battery: 12 D Cell Alkaline (not included)

Vacuum Pump: 12 V DC exceeds 525 mmHg for the first few hours and exceeds 300 mmHg for the stated run time*

Clinical Airflow: Greater than or equal to 30LPM (based on tests performed with fresh Duracell® alkaline batteries

Emergency Preparedness Suction Unit

Ideal for Surge Hospitals, addressing hospital surge capacity, and facility power outages.

AE-6800

Features:

- 6-9 hour run time*
- With universal canister holder, the DCell accommodates most standard hospital suction canisters
- Can also be powered indefinitely from external DC or AC power
- 3 year warranty

*Run time is defined as the period of time that the device generates more than 300 mmHg negative pressure. Total run time typically varies between 6-9 hours. These run time specifications are based upon tests using new Duracell® CopperTop batteries. Run time will vary depending on battery manufacturer, state of the charge, ambient temperature, and age of the batteries.

Broselow® Pediatric Resuscitation System

NEW Broselow[®] Pediatric Emergency Tape "2019 Edition" mL units listed. AE-4800 Broselow[®] Pediatric Emergency Tape, 5/pkg., \$120.00

The Originally Developed Pediatric Emergency Tape.

When time and accuracy are crucial during a pediatric emergency situation, turn to the Broselow® System which is designed with children's care and procedural accuracy in mind. Each color-coded system supplies you with all the medical dosage information (except for infusion drugs) and size-specific equipment you need for your young patients' emergency resuscitation requirements.

QUICK AND SIMPLE

1. Measure

Measure the child with the Broselow[®] Tape. This gives you an accurate weight estimate, equipment sizes, and drug dosages.

2. Treat

Reach into the bag for exactly the right equipment for I.V., intubation, O_2 delivery, or intraosseous access. There's no guessing.

The 2019 version of the Broselow Reference Tape will be compliant with the most current PALS Standards and will include the following:

• Pre-calculated doses in milligrams, as well as all doses in pre-calculated ml, making the entire process error free by removing the need for any calculations.

- The new tape will accommodate for obesity by allowing for a habitus adjustment if deemed appropriate to the tape weight estimation.
- When used without the habitus adjustment new tape provides an accurate estimate of Ideal Body Weight, over actual body weight,

which is preferred for many emergency medications.

- Updated with additional essential medications for both EMS and the ER.
- Contains a separate section, Quick Access Meds, for those medications needed immediately.

A-SMART[®] Premier[™] Broselow[®] ColorCode[™] Cart

PBL-PC-9 <u>BASIC</u> A-SMART[®] Premier[™] Broselow[®] ColorCode[™] Cart (pictured left)

Includes Nine-Drawer A-SMART Premier Breakaway Lock Cart (30" total drawer space), slide-thru side shelf, 30" locking bar, stabilizing frame/bumper system, seamless plastic top, soft-grip push handles, three accessory attachment panels, and all-swivel casters (two locking and one tracking).

Rapid Assessment...Rapid Intervention

Broselow® Pediatric Resuscitation System

AE-4700 Broselow® Pediatric Resuscitation System, \$1,950.00 Includes twenty-eight size-specific procedural modules in seven pouches, flying carpet, Broselow® Pediatric Emergency Tape, and all other equipment shown above. Comes contained in a heavy-duty ALS equipment organizer.

The Broselow[®] Pediatric Resuscitation System is approved for the PALS education program. For children 3 to 36 kg. AE-4712 Procedural Modules, \$1,005.00

A complete set of twenty-eight refill modules for the Broselow[®] System. *Laryngoscope handles sold separately.*

AE-4703 Equipment Pack, \$725.00

Two disposable manual resuscitators, four cuff masks, three disposable BP cuffs, one gauge, two Magill forceps, and two Vital View II[™] LED fiber optic laryngoscope handles. *Call for details*. NEW AE-4800 Broselow[®] Pediatric Emergency Tape, 5/pkg., \$120.00

Broselow[®] ColorCode[™] Cart, *see page 41*. ClearView Security[™] Drug Box, *see page 46*.

Broselow® System and Cart

STEP 1 *Measure the length of your pediatric patient with the Broselow® Pediatric Emergency Tape.* Child's length (shown as purple at right) falls within a color bar and weight zone on the Broselow® Tape (see page 65).

A reference at each color bar on the tape informs you of equipment sizes to perform emergency resuscitation on the child. A reference at each weight/color zone on the tape shows pre-calculated medication dosages in milligrams. Designated resuscitation equipment is contained in corresponding, color-coded equipment pouches or drawers.

STEP 2 *Find specific equipment swiftly and accurately with the Broselow System as your guide.* Color-coded pouches contain size-specific equipment needed for pediatric emergency resuscitation.

Use A-SMART[®] to create a complete pediatric resuscitation system. Premier[™] Broselow[®] ColorCode Carts provide color-corresponding space and locking options to stock medications and additional equipment. Example on the right shows:

PBL-PC-9A Premier[™] Broselow[®] Complete ColorCode Cart System

Includes **PBL-PC-9** (basic cart, see page 41), **AE-4712** (procedural modules), **AE-4703** (equipment pack), and a single Broselow[™] Pediatric Emergency Tape.

Uses disposable "AA" batteries.

8722LM Stubby Rechargeable Handle with LED Light Source and **NiMH Battery** (without charger)

8722L Stubby Handle with **LED Light Source** Uses disposable "AA" batteries.

Introducing the new Heine Laryngoscope Handles with LED Light Source. These LED handles offer illumination that is 3X brighter than a 3.5V Halogen Bulb. LED illumination also allows for significantly longer usage time. Plus, the LED Light Source has a lifespan of 50,000 hours and comes with a 5 year warranty.

Heine Handles with LED Light Source are not approved for Sterrad[®] Sterilizers at this time.

Additional Status Indicator Cap Option

The Status Indicator Cap allows the user to see a more specific charge status anytime. When you turn your handle on or remove it from the charger, the LED Indicator on the bottom cap lights up for 10 seconds displaying how much battery time remains. The Indicator also remains lit at any time a laryngoscope blade is attached to the handle.

The Status Indicator Cap comes with the 8721LED Handle. One can also be added to any Heine Adult Lithium Ion LED or 3.5V Lithium Ion Halogen Handle (special Lithium Ion battery required). Call Customer Service for details.

8726 NT 300 Charger

The NT 300 Charger offers an easy-to-see visual indicator on your handles charging status. The entire collar of the NT 300 is brightly illuminated. When you place your handle into the well to be charged, the light ring will pulse, indicating your handle is being charged. Once your handle is fully charged, the light rings stay brightly lit for 4 hours indicating the full charge. This unit prevents over charging the battery and helps to guarantee extended battery life. The NT 300 is the only charger that gives you this immediate visual clue as to where your handles stand in the charging process.

The NT 300 fully charges a handle with a dead battery in a maximum of 4 hours and is compatible with all Heine rechargeable laryngoscope handles.

HEINE Laryngoscopes

NEW HEINE EasyClean LED Laryngoscope Handle CALL FOR PRICING

8721ECL Heine Adult EasyClean LED Laryngoscope Handle 8720ECL Heine Pediatric/Slim EasyClean LED Laryngoscope Handle 8722ECL Heine Stubby EasyClean LED Laryngoscope Handle

The ultimate "Green" option to help reduce your carbon footprint. The HEINE EasyClean LED Laryngoscope Handle was developed to allow even simpler, faster and safer hygienic reprocessing of the handle – no complex disassembling and assembling of batteries and light unit. This saves the technical service personnel a great deal of time, and reduces the training and maintenance effort.

• Non-slip "Wave Design" provides a more secure grip and allows for wipe disinfected after use

100 % waterproof: in the case of immersion disinfection ('High-Level Disinfection') or low temperature sterilization processes (STERRAD[®], STERIS[®]), neither the batteries nor the LED light unit need to be removed

- No removal of the light unit required for use in autoclaves, just batteries
- Maximum brightness: 3 x brighter than conventional halogen light, 4,000 lux (20 lm) at a distance of 20 mm from the blade tip
- Authentic color rendering and homogeneous illumination
- Typically 10 hours of operating time (in continuous operation); battery handle for 2 x C-cells (R14/LR14)
- Fade-out feature: brightness reduces slowly as battery operating time diminishes, for even more efficient battery use
- Compatible with all laryngoscope blades according to ISO 7376 (Green Standard)

HEINE Classic Fiber Optic Blades CALL FOR PRICING

- High-performance aspherical condenser lens reduces corneal reflection
- Synthetic rubber brow rest
- Ergonomic design and integral thumb rest improves stability and allows one finger control of all functions

- 3.5V Rechargeable Handle:
- 30 hours continuous use between charges
- LED lighting technology
- Electronic rheostatic light intensity control provides infinite continuos control and auto off feature after 2 minutes

Desk Charger:

- Colored LEDs power displays charging state
- Storage compartment accommodates a small selection of specula or spare lamps
- Includes wall bracket for permanently mounting to wall or cabinet

Includes an anti-theft locking feature. 2 year warranty on instrument heads and handle, lifetime warranty on LED lamp.

LinkTemp® Non-Contact Infrared Thermometer

AD-325 LinkTemp® Non-Contact Infrared Thermometer, \$129.00

The LinkTemp is designed to produce an instant forehead temperature without contact by reading the radiated temperature of the forehead vasculature. The vasculature in this area is linked to the heart by the carotid artery, which is directly linked to the aorta. It forms part of the main trunk of the arterial system. So long as the patient's blood flow is permanent and regular, the method allows precise measurements of the temperature.

- No probe covers required; significant annual savings
- No contact with patient's skin reduces the risk of cross-contamination

Armstrong Ophthalmoscope & Otoscope Set

AD-425 Ophthalmoscope and Otoscope Set, \$260.00 AD-426 Otoscope Only, \$139.00 AD-427 Ophthalmoscope Only, \$196.00

Ophthalmoscope includes instrument head with halogen bulb, five apertures, and seventeen lenses. Otoscope is fiber optic with removable viewing lens, disposable specula (2.75 mm and 4.25 mm), and insufflator fitting for pneumatic otoscopy. "AA" batteries included in each handle. 2.5V halogen bulb.

- Non-contact reading in 1 second from 1.2-2" away
- Two color LCD with highly accurate 1/100 degree reading
- Temperature can be displayed in F or C
- Automatic power off (30 seconds) to conserve energy
- Modes for body, surface and room (ambient) temperature
- Visual/audible alarm if temperature exceeds 100.4°F
- Performs up to 100,000 readings
- Long battery life

HEINE EN 200 Wall Transformer with Ophthalmoscope/Otoscope CALL FOR PRICING

AD-500 HEINE EN 200 Wall Transformer with

Ophthalmoscope/Otoscope

- Lower power consumption saves costs and is environmentally-friendly
- The integrated galvanic separation protects the handles from unwanted electrical interaction
- Space-saving housing without any openings allows optimal disinfection
- Handle switches on and off automatically when taken off or returned to the unit
- Set your brightness level once and it stays there every time you use your instrument

Portable LED Diagnostic Set

AD-440 Portable LED Diagnostic Set, \$595.00

3.5V Otoscope:

USB port

head removal

• Fiber optic light transmission for an unobstructed view

• When not in use and when not

switches off after 15 minutes

Connectivity ready with built-in

prevents unauthorized instrument

• Integrated anti-theft system

• Lifetime warranty against

manufacturing defects

returned to the unit, the illumination

- Optical glass reduces reflection and provides 3X magnification
- Bi-directional swivel lens allows instrumentation
- Insufflator fitting for pneumatic otoscopy

3.5V Ophthalmoscope:

Wall and Mobile Aneroid Sphyg

AD-310 Wall Aneroid Sphyg, \$105.00

Large, luminescent, 6" dial with markings. Cuff stores conveniently behind the case. Tube stretches to 8 feet.

AD-315 Mobile Aneroid Sphyg, \$220.00

Large, luminescent, 6" dial with markings. Features five-leg caster stand with a range of 40"-54"H. Manometer angles back 15°.

Sphygs

All Latex Free

Armstrong Sphyg

AD-200 Adult, \$43.00 AD-200C Child, \$43.00 AD-200-O Extra Large, \$55.00 Nylon blue cuff with printed index, range markings, and artery label. 300 mmHg, no-pin-stop manometer. Ten-year calibration warranty.

808 Blood Pressure Gauge, \$18.00

Quad Cuff

AD-140 Quad Cuff Multiple BP Kit, \$125.00

Includes child, small adult, adult, and large adult pre-gauged cuffs with artery label and inflation system. 300 mmHg, no-pin-stop manometer with bulb. Includes nylon case. Ten-year calibration warranty.

AD-130 Tri-Cuff Kit, \$110.00

Same features as the Quad Cuff, but without child size.

AD-220 Armstrong Economy Hand-held Adult Aneroid Sphyg, \$90.00

Premium Sphyg

AD-215 Premium Armstrong Sphyg, \$55.00 AD-215I Infant, \$55.00 AD-215C Child, \$55.00 AD-215-O Large, \$60.00 AD-215-B Bariatric (44.66cm), Burgundy, \$79.00

- Lifetime calibration warranty
- Heavily chrome plated
- Navy cuff includes gauge holder
- Luminescent dial
- Includes zippered case

Stethoscope and Aneroid Sphyg Set

AD-135 Stethoscope and Sphyg Combo Set, Black, \$49.00 AD-135T Teal, \$49.00 AD-135R Red, \$49.00

Color-coordinated combo sets include an aneroid sphyg with 300 mmHg no-pin-stop manometer, bladder, and bulb; and a Sprague-type stethoscope in a nylon carrying case. Twenty-year calibration warranty. Five-year warranty on Sprague.

E-Sphyg 2 Mobile Digital Aneroid Sphyg

AD-265 E-Sphyg 2 Mobile Digital Aneroid Sphyg, \$495.00

The E-Sphyg 2 replaces the vulnerable mercury column with a backlit digital simulation that is visually familiar to every practitioner. The device features dual mode operation, manual and automatic. In manual mode the practitioner measures using the traditional auscultatory method. In auto mode, the instrument will measure systolic and diastolic pressure and pulse automatically using child, adult, and large adult cuffs (included).

Hand-Held Pulse Oximeters

Hand-Held Pulse Oximeter System CALL FOR PRICING

AD-1500 SPECTRO2[™] 10 Hand-Held Pulse Oximeter System

- PI (Pulse amplitude Index) Indicator helps identify and maintain a good test site, and enables confidence in results
- One of the largest displays on the hand-held market
- On-board sensor storage cradle stores and protects sensor (reduces damage and minimizes replacement costs)
- Compatible with all BCI® sensors
- New BCI® 20" Spot-Check Sensor (keeps frustrating cable tangles to a minimum for quick, easy patient assessments

Specifications:

SpO₂ (Functional) Range: 0-99% (1% increments)

Pulse Rate Range: 30-254 bpm Averaging: 8 seconds

- Pulse Signal Strength Range: 0-9 indicator, indicates logarithmic strength of patient pulse
- Display: 9-segment red LED bargraph

Power Requirements

Battery: 4 [•]AA" alkaline or the optional AD-1502, 2-cell lithium ion rechargeable battery pack (with optional AD-1503, docking station/charger) External (from AC Charger): 9V, 3A output; input of 100-240 VAC, 50Hz, 60Hz

Battery Life

Alkaline Cell Life: Approx. 32 hours of use

Rechargeable Battery Life: 54 hours of continuous use (new)

Memory Storage: data for up to 99 patients

Dimensions: 3.3"W x 6.1"H x 1.7"D **Weight:** .75 lbs. (with "AA" batteries)

Standards: EN60601-1, EN60601-1-2, ISO 9919

Comes with a 3 year warranty.

Dopplers and Wright[™] Peak Flow Meter

Elite Doppler System

AD-879 Elite 200 Doppler with 2 MHz. Probe, \$823.00 AD-880 Elite 200 Doppler with 8 MHz. Probe, \$823.00 AD-881 Elite 200 Doppler with 5 MHz. Probe, \$823.00 AD-882 Elite 200 Doppler with 3 MHz. Probe, \$823.00 AD-883 Elite 200 Doppler with 5 & 8 MHz. Probes, \$1,030.00 AD-884 Elite 200 Doppler with 3 & 5 MHz. Probes, \$1,030.00 AD-885 Elite 200 Doppler with 3 & 8 MHz. Probes, \$1,030.00

The Elite 200 Doppler lets you determine fetal viability as early as eight weeks into a pregnancy and assists in monitoring arterial and venous blood flow. This high-powered doppler is also able to locate both superficial and deep vessels faster and provide strong signals with a crystal-clear, static-free sound.

The standard heart rate display on the

Elite can provide for both OB and vascular applications.

Optional Probes: AD-891 2 MHz. OB Probe, Waterproof, \$398.00 Later fetal heartbeat. AD-892 2 MHz. OB Probe, \$398.00 Later fetal heartbeat. AD-893 3 MHz. OB Probe, \$398.00 Early fetal heartbeat.

AD-895 5 MHz. Vascular Probe, \$398.00 Deeper veins and arteries. AD-898 8 MHz. Vascular Probe, \$398.00 Peripheral vessels.

The peak flow meter's scale also

conforms to the 1991 recommended

technical standards by the National

National Heart, Lung, and Blood

American Thoracic Society (ATS)

These meters come with a PF-375 sterilizable mouthpiece with universal

tapered design for both adult and

the PF-440X low range meter.

NOTE: Children six years and younger, or

those with excessive lung damage, should use

Waveform 26.

pediatric use.

Institute (NHLBI); and is based on

Asthma Education Program (NAEP);

Mini-Wright[™] Peak Flow Meters

PF-339X Mini-Wright Peak Flow Meter (60-880 lpm) with NAEP/ATS26 Scale, 10/pkg., \$300.00

FOR SINGLE-PATIENT USE PER FDA STANDARD

These compact, portable Peak Flow Meters allow an asthmatic patient's progress to be inexpensively monitored on a daily basis at home, work, or school.

- Help predict asthma episodes
 - Allow therapeutic intervention
 Easily cleaned minimal maintenance

The Mini-Wright measures the maximum flow rate in a forced exhalation – known as the peak expiratory flow (P.E.F.). After determining a patient's best P.E.F. with his/her physician, the patient self-tests daily as instructed by the physician and records the highest reading on a daily trend chart.

PF-440X AFS Low-range Mini-Wright (30-400 lpm) with Sterilizable Mouthpiece, 10/pkg., \$300.00

The AFS Low-range Mini-Wright incorporates the Aerodynamic Flow System (AFS) to bring accuracy and consistency to patients with lower peak flow requirements. This new, smaller Mini-Wright is specifically designed for younger patients. The scale is clear and easy to read.

Mouthpieces for Wright Peak Flow Meter

PF-310 Disposable Mouthpieces and PF-320 Disposable Mouthpieces for Pediatrics, (*must be used with PF-380*), 500/box: 1 box, **\$65.00**; 3 boxes, **\$165.00**; 6 boxes, **\$300.00**; 12 boxes, **\$540.00** Mouthpieces are not made of cardboard; eliminates dust.

PF-315 Disposable Mouthpieces with One-way Valve, 200/box, \$105.00

PF-380 Mouthpiece Adapter for Pediatric Use (allows PF-320 to be used with PF-286), **\$8.00**

PF-375 Universal Tapered Mouthpiece, **\$8.50**

Stethoscopes

NEW Adscope[®] Convertible Stethoscope

AD-610 Adscope Convertible Stethoscope, Black, \$79.95 AD-611 Adscope Convertible Stethoscope, Burgundy, \$79.95 AD-612 Adscope Convertible Stethoscope, Grey, \$79.95 AD-613 Adscope Convertible Stethoscope, Navy, \$79.95 AD-614 Adscope Convertible Stethoscope, Royal Blue, \$79.95

- Adjustable frequency design (AFD) technology provides the acoustic response of a traditional bell and diaphragm in a convenient two-sided chestpiece
- Extra-large bell for unsurpassed low-frequency response
- Ultra-sensitive diaphragm for amplifications and crisp high-frequency response
- AFD technology further enhances acoustic response: use light pressure for low frequencies, firm pressure for high frequencies

Neonatal Stethoscope

AD-103 Neonatal Stethoscope, \$25.00

- External binaural
- Dual-head brass chrome-plated chestpiece
- One-piece, PVC, 24", grey tubing

Dual Head Stethoscope

Dual Head Stethoscope AD-100 Black, \$18.00 AD-100LB Light Blue, \$18.00 AD-100GLD Gold, \$18.00 AD-100GR Green, \$18.00 AD-100R Red, \$18.00 AD-100RB Royal Blue, \$18.00 AD-100NY Neon Yellow, \$18.00

Precision-anodized, aluminum chest piece and adjustable, chrome-plated, brass binaurals. 24" tubing.

Child Stethoscope

AD-105 Child Stethoscope, \$25.00

- Dual head with swivel
- Brass chrome-plated binaural
- One-piece, PVC, 21", black tubing

Dual Training Stethoscope

AD-120 Dual Training Stethoscope, \$25.00

Permits students to hear exactly what the instructor is hearing. A simple turn of the stem permits a quick change to a Ford-type bell.

Scales

see page 80

Scales

Physician Digital Scale

AC-611 Physician Digital Scale, \$499.00

- LB/KG Lock-Out ends prescription errors caused by LB/KG confusion during weighing
- Fully digital platform, from weighing sensors through readout, reduces errors caused by analog parts
- Easy-to-read 1" high LCD display
- Large, low-profile platform provides safer access and stability
- EMR connectivity via USB
- User friendly interface with full compliment of digital functions including BMI
- Capacity: 500 lbs.
- Full two-year warranty

Remote Display Scale

AC-615 Remote Display Scale, \$296.00

- Remote LCD display on 9' cord
- Weight reading in lbs. or kg.
- 2 oz./0.05 kg. graduation
- 9V battery and AC adapter included
- One-year limited warranty
- Capacity: 400 lbs.
- Full two-year warranty

Balance Beam Scale AC-600 Physician Balance Beam Scale, \$282.00

Die cast, easy-reading pound beam, heavy duty 3/32" steel base, and steel lever system comes with measuring rod (30" to 78") and Dura-Top[™] non-peel ABS platform cover.

Convenient Features

- Capacity: 390 lbs.
- Factory calibrated
- Simple field recalibration
- Graduation is engraved and paint filled; easy to read
- Full ten-year warranty

AC-602 With Optional Casters, \$344.00

Digital Pediatric Seat Scale

AC-635 Digital Pediatric Seat Scale, \$504.00

- 1" easy-to-read LCD display
- Auto-zero, auto-off, zero-out, LB/KG conversion, hold/release
- Capacity: 50 lbs.
- Seat size: 241/4"W x 141/4"D x $18^{1}/2"H$

Digital Wheelchair Ramp Scale

AC-650 Digital Wheelchair Ramp Scale, \$2,996.00

- EMR connectivity via USB
- Wheels and folding ramps for easy portability and storage
- Wide platform for wheelchair or bariatric use
- Calculates BMI
- Capacity: 1,000 lbs.
- LB/KG Conversion, LB/KG Lock Out, Body Mass Index, Zero Out/Tare, Hold/Release, Reweigh, Auto Zero

Digital Pediatric Scale

AC-640 Digital Pediatric Scale, \$406.00

High-performance digital pediatric scale with motion-sensing technology can capture the weights of even the most active babies.

- Easy-to-read LCD
- Large, stable weighing tray with raised edges for baby's comfort and safety
- Weighs in pounds and kilograms
- Waterproof buttons
- Features auto-off, auto-zero, and low-battery indicator
- Tare memory
- Full two-year warranty

Slippery Slider and Hospital Equipment

Armstrong Slippery Slider

AE-150 Patient Slippery Slider, 22" x 72", \$139.95 AE-155 Patient Slippery Slider, 18" x 72", \$139.95 AE-160 Patient Slippery Slider, 18" x 48", \$119.95

Alleviate lifting strain, transfer large patients with minimum staff, and ensure patient comfort. Armstrong Medical offers three sizes of Slippery Sliders. Each has an ultra-smooth, polyethylene surface that makes patient transfer virtually free of friction.

- Reduces overexertion related back injuries
- Usable during x-rays; Slippery Slider is radiolucent
- Allows for easy grip with cut-out hand holes
- Strong, lightweight, and thin all models only ³/16" thick

Adjustable Laptop Computer Transport Stand

AC-548 Adjustable Laptop Computer Transport Stand, \$490.00

- Stand tray securely holds laptop in place
- Heavy-gauge coated steel construction
- Foot ring easily depresses to adjust stand height 35" to 45" for standing or seated use
- Easy rolling 3" casters provide a smooth, quiet ride
- Side access handles for "grab and go" use

Mobile I.V. & Infusion Stands

AC-542 Armstrong LIGHT DUTY Custom I.V. Stand, \$148.00

Four-pronged, adjustable (47"-84") I.V. stand has a 20" diameter base and 2" casters. Weight capacity is 22 lbs. AC-540 Armstrong LIGHT DUTY Economy Mobile I.V. Stand, \$75.00

Adjustable (47"-84") and easy to roll. Weight capacity is 22 lbs. 23" diameter base and 2" casters.

Security Laptop Stand

AC-549 Security Laptop Stand, 635.00

- Dual-locking work surface keeps laptop and data secure and provides a large work area
- Work area adjusts from 35"-45"
- Hand levers operate a gas spring lift to adjust height for sitting or standing use
- Heavy, five-leg aluminum base for safety and stability
- 3" rubber casters for quiet use

Schrader & Disposables

Schrader Connectors

Schrader Medical twist-release gas connectors are safety-keyed for air. This quick connector safely handle up to 200 psi. Design prevents interchangeability of major internal parts for different gases. They are UL certified and comply to NFPA 99 (2002 edition).

Compressed Air Check Unit AS-4126 ¹/4" - 18 NPT Male, \$100.00 Safety-keyed Adapter AS-4147 ¹/4" Hose Barb, \$65.00

Disposable Resuscitators

AE-6500 Adult Bag Mask, 6/case, \$130.00 AE-6510 Child Bag Mask, 12/case, \$225.00 AE-6520 Infant Bag Mask, 12/case, \$225.00

These disposable self-inflating resuscitation devices feature a textured bag, double-swivel elbow, and a 40" tube-style oxygen reservoir. Bags come standard with an air-cushioned mask, an integrated pressure port for monitoring inspiratory pressure, and an exhalation diverter to help safeguard the caregiver. Additionally, the child and infant bags include a pressure release valve as an extra layer of safety for patients with the most delicate lungs.

Disposable Pressure Infusers

AE-1580 Infusable[®] Disposable Pressure Infusers, 500 ml, 12/case, \$225.00 AE-1585 Infusable® Disposable Pressure Infusers, 1000 ml, 12/case, \$245.00

Sphygs

SSCOR[®] DCell Suction[™]

AE-6800 DCell Suction, \$1,250.00

Specifications:

12"H X 9" W X 11"D

Weight: 9.5 lbs. with batteries installed

Battery: 12 D Cell Alkaline (not included)Vacuum Pump: 12 V DC exceeds 525 mmHg for the first few hours and exceeds 300 mmHg for the stated run time* Clinical Airflow: Greater than or equal to 30LPM (based on tests performed with fresh Duracell® alkaline batteries

For more information, see page 64.

Disposable Splints

Speedsplint^{...}

Cost Effective For Hospitals and EMS. Disposable, No Cross-Contamination, Single-Patient Use.

The splint can go with the patient to X-Ray or even surgery and be thrown out after. There is no need to worry about lost expensive splints.

AE-1605 Speedsplint[™] Femoral Traction Splint, \$85.00

- Includes splint, padding, harness, and groin pads
- Fits anyone up to 6'4" tall
- Has precise traction tension control
- Saves space

AE-1600 Speedsplint[™] Multi-Purpose Splint, 10/pkg., \$80.00

- Single splint fits bent or straight elbow, ankle, and wrist
- Unique fold-and-splint design reduces medic's pack weight, simplifies inventory requirements, and stores flat for easy transport
- Ideal for arm injuries, as well as foot and ankle injuries

AE-1604 Speedsplint[™] Adjustable Leg Splint, \$65.00

- Lightweight, temporary immobilization for all leg injuries
- Provides extra support above the knee for difficult-to-splint knee injuries
- Robust ankle support eliminates undesirable leg rotation
- Fits all leg lengths
- Three adjustable sizes: small, medium, and large

Splints

Sam[®] Splint

EM-500 Sam® Splint, \$15.00 Can splint an arm, leg, or hand. Only 4¹/4" x 36". X-ray invisible, waterproof, and reusable. *New flat design for better storage.*

EM-501 Sam Splint Jr., 4¹/4" x 18", \$10.00

EM-502 Sam Wrist Splint, 4¹/4" x 9", \$5.95 EM-505 Sam Finger Splint, 12/pkg., \$17.00 Video upon request with purchase.

Prosplints®

AE-1800 Prosplints Complete Adult Splint Kit, \$250.00

Includes wrist/forearm splint, full arm splints (small and large), full leg splints (small and large), universal combo splint, universal rib splint, hard e-collars (small and medium), and carrying case.

- Quick application and removal
- X-ray translucent/MRI compatible
- Wipes clean for reuse
- Folds for compact storage

AE-1120

Sager Extreme® Bilateral Splint

AE-1120 Sager Extreme Bilateral Traction Splint, \$560.00

- Indicated for treatment in proximal third and mid-shaft femoral fractures
- Radiolucent to all areas of femoral fracture
- Compact, robust, and lightweight
- Fits adult or child
- Treats unilateral or bilateral fractures
- Unfolds and is ready to apply in under 15 seconds
- Rapid one-person application

Sager Form III Splints

AE-1110 Sager Form III Complete with Case, \$355.00 AE-1115 Sager Form III Bilateral Complete with Case, \$495.00

Like all Sager Splints, Form III Splints allow the continuous documentation of traction force applied – Quantifiable Dynamic Traction. The tough ischioperineal cushion base, combined with the slender, anatomically-shaped cushion, mean that perineal examinations and procedures may be performed with the splint in place. Extra-wide leg cushion provides improved comfort and immobilization. For ages four and up.

Vacuum Splints

AE-1875 Immobile-Vac Deluxe Extremity Splint Set, \$500.00 Includes leg splint, arm splint, wrist/ankle splint, carrying case, pump, suction unit adapter, and extra valve.

AE-1880 Immobile-Vac Pediatric Mattress Set, \$370.00

Mattress set includes mattress, case, pump, and adapter.

- Immobilizes injured areas without external pressure
- Eliminates the need for tape, boards, or gauze

Infant Sager Splint

AE-1105 Infant Sager Traction Splint, \$420.00

The AE-1105 fits an inseam of 8" to 24". Single or bilateral application.

Quantifiable Dynamic Traction: the traction decreases as the spasm releases and prevents excessive traction. Dorsalis pedis and posterior tibial pulses are accessible. No heel stand and no risk of sciatic nerve compression. For ages six and under.

Splints and Extrication Devices

Hare® Traction Splint

AE-276 Adult Traction Splint, \$430.00 AE-281 Pediatric Traction Splint, \$430.00

Hare Traction Splint, the original traction splinting device, realigns a fractured femur to its proper position. Protect your patient from further hemorrhage and additional nerve, vascular, bone, and muscle damage. AE-276 and AE-281 both include ratchet traction device and "S" ring hook, heel stand and release pull ring, collet locking device, four leg support straps, ischial strap and pad, adjustable ankle strap, carrying case, and instructions.

Olympic[™] Papoose Boards

AE-560 Papoose Board, 36" Regular (ages 2-5), \$415.00 AE-570 Papoose Board, 48" Large (ages 6-12), \$560.00 AE-580 Papoose Board, 60" X-Large (teen-adult), \$745.00

An effective way to immobilize a frightened, struggling child. Three sets of closing canvas flaps with Velcro[™] closures hold the patient securely to the rigid backboard. Flaps can be individually released to expose the injured area.

K.E.D. Extrication Device

AE-1050 K.E.D. Extrication Device with Case, \$190.00

K.E.D. has horizontal flexibility for ease of application in cramped areas, and vertical rigidity for spinal stability and safety. It is an invaluable product for any emergency team.

- Rapid application in tight spots
- Firm support for the victim's head, neck, and spine

Further assistance can be given to the victim while the K.E.D. remains in place:

- CPR can be easily performed
- MAST trousers can be applied without interference
- Traction splint can be applied
- Will not interfere with x-rays

Pedi-Air-Align Complete System

AE-640 Pedi-Air-Align Complete System, \$305.00

The Pedi-Air-Align's patented dualplane head drop system allows for a patient to be completely immobilized while their airway is managed. The board accommodates the larger occipital area of a child's head and creates neutral alignment of the airway which is critical to maintaining a patient's airway. Rotomolded from high-density polyethylene (HDPE), this one-piece, seamless product allows for complete decontamination.

- Patented dual-plane head drop system
- Lifetime guarantee
- Foam-filled, lightweight, ergonomic design
- Quick-strap, hook-and-loop strapping system

Board size: 48"L x 12"W x 1.75"H

Includes board, shoulder restraint, chest strap, four body straps, two wrist restraints, two head blocks, two head block straps, and a carrying case.

Cervical Immobilizers & Speedsplint[™]

AE-590

SpeedBlocks[™] Head Immobilizer

AE-590 SpeedBlocks[™] Head Immobilizer, \$57.00

Includes one set of blocks, one universal base, one set of pads, and straps.

- Disposable head straps and block base pads allow for easy, low-cost replacement
- Four quick steps for application
- Blocks slide for multi-axis adjustment
- Blocks weigh only 5.2 oz. each
- Reliable handle-locking mechanism with quick-release locks ensures confident application
- Blocks provide contoured fit for patients two and up

- Universal base and blocks with replaceable foam pads for easy cleaning
- Base independently verified for greater than 99% decontamination efficacy
- Made of HDPE durable plastic and non-absorbing, padded blocks (radiolucent; MRI and CT scan compatible)

AE-591 Strap and Pad Replacement Set, \$22.50

Includes ten foam block pads, ten Velcro[®] head straps, and five foam base pads (five complete replacement sets).

Head Immobilization System

AE-1031 Head Immobilization System, \$100.00

This lightweight, easy-to-use system can be used with most spine boards, extrication collars, or as a stand-alone immobilizer. Provides access to monitoring patient's ears. System offers a metal-free design, which allows for x-rays, CT scans, and MRIs. Made of

Best Strap[™] System

AE-543 Best Strap System, \$99.00

Introducing the Best Strap System, the total strap system for fast, firm, total body immobilization. Comes with five straps for the torso/limbs and two straps that go over the patient's shoulders. All straps are color-coded for easy application and less confusion. Straps close with Velcro[®].

AE-543C Carrying Case, \$21.00

closed-cell foam, this immobilizer will not absorb blood or other bodily fluids. Also, the immobilizer is easily sanitized between uses.

Includes two closed-cell foam head pads, an attachment base, and two reusable head straps.

Speedsplint™

AE-1600 Speedsplint[™] Multi-Purpose Splint, 10/pkg., \$80.00

The splint can go with the patient to X-Ray or even surgery and be thrown out after. There is no need to worry about lost expensive splints.

- Single splint fits bent or straight elbow, ankle, and wrist
- Ideal for arm injuries, as well as foot and ankle injuries
- Unique fold-and-splint design reduces medic's pack weight, simplifies inventory requirements, and stores flat for easy transport

X-ray Translucent Boards

Backboard Straps

AE-645 Two-piece Black 5' with Swivel Speed Clip, \$18.50 AE-649 Two-piece Black 7' with Swivel Speed Clip, \$18.50 AE-646 Two-piece Black 5' with Buckle, \$13.00 AE-647 One-piece Black 7' with Buckle, \$13.00 AE-648 One-piece Black 9' with Buckle, \$14.00 All clips and buckles are metal. Add

"O" to the end of the product numbers above to designate orange.

BaXstrap[™] Spineboard

AE-540 BaXstrap Spineboard, \$230.00

- One of the lightest boards on the market
- No seams; easy to clean and disinfect
- Contoured design; nests compactly, provides patient comfort and rescuer ease of use
- Extra-large, raised handholds
- Radiolucent; MRI and CT compatible
- Pins are molded into board for maximum strength
- Withstands greater than 2,500 lbs.
- Includes strap holes for pediatric patients
- Can be used for water rescue
- Limited lifetime warranty

Ultra-Vue

AE-585P (vellow), AE-585-OP (orange), AE-585-BP (blue), Ultra-Vue Board with Pins, \$175.00 AE-585 (yellow), AE-585-O (orange), AE-585-B (blue), Ultra-Vue Board, \$160.00

- Weight rating: Approximately 1,100 lbs.
- 250 lbs. float capacity
- Size: 16"W x 72"L, 1³/4" thick; 15 lbs.
- X-ray translucent, MRI and CT scan compatible
- Flat patient surface won't compromise CPR efforts or aggravate cervical spine injuries

Ultra-Spac-Sav

AE-575 Ultra-Spac-Sav w/o Pins, \$370.00 AE-575P Ultra-Spac-Sav with Pins, \$385.00

This innovative plastic folding backboard features stainless steel mechanical pivot with internal aluminum runners. Stores in half the space of standard backboards, allowing it to fit in a backpack for search & rescue and fire apparatus.

- Weight rating: 500 lbs.
- Size: 72"L x 16"W, 1.75" thick
- Folded size: 39"L x 16"W, 4" thick

HeadBed[™] II Cervical Immobilization Device

AE-3020 HeadBed[™] II Cervical Immobilization Device, \$6.00

Disposable cervical immobilization device designed for effective motion restriction of infants, children, and adults.

Outstanding patient access for effective assessment without compromising immobilization

AE-575

Extrication Collars

Stifneck[®] Select[™]

AE-3015 Stifneck Select Adjustable Extrication Collar, \$15.00 AE-3016 Stifneck Pedi-Select[™] Adjustable Extrication Collar, \$15.00

Four collars in one: The Stifneck Select adjusts to match the four adult Stifneck sizes (Regular, Short, Tall, and No-Neck[™]), so it's the only adult collar you need.

- Minimizes inventory and storage requirements
- Rear panel opens to allow C-spine palpation and visualization
- Large trachea hole for pulse check and airway procedures
- Radiolucent; MRI and CT compatible
- Adjustment tracks ensure selected size stays in place

Stifneck Extrication Collars

AE-3000 Stifneck Collar, Regular, \$9.00 AE-3002 Stifneck Collar, Short,

\$9.00
 AE-3004 Stifneck Collar, Tall, \$9.00
 AE-3008 Stifneck Collar, No-Neck[™],
 \$9.00

AE-3006 Stifneck Collar, Pediatric, \$9.00 AE-3005 Stifneck Collar, Baby No-Neck™, \$9.00

One-piece, rigid extrication collar designed for optimal patient care.

- Low-angle chin ensures stable support without limiting airway
- Color-coded straps for easy and accurate sizing
- Fold-flat design conserves storage space
- Two pediatric sizes designed for children and infants

Philadelphia® Tracheotomy Classic Collars

All Adult Philadelphia[®] Collars are **\$18.00**. Product numbers shown in chart below.

AE-806T Complete Starter Set, \$108.00

Includes AE-821T, AE-831T, AE-832T, AE-842T, AE-843T, and AE-853T. **AE-803T Basic Starter Set, \$54.00** Includes AE-831T, AE-842T, and AE-853T. **AE-810T Philadelphia Collar, Pediatric, \$18.00 AE-809T Philadelphia Collar, Infant, \$18.00** For ages 1-3.

- Total cervical arch support
- Two-piece design
- Suitable for extrication and long-term use
- Machine washable
- Radiolucent
- Large tracheal opening for pulse monitoring and tracheotomy

Collars and Splints

Philly® Patriot® Collars

AE-720 Patriot Collar, Adult, \$9.50 AE-721 Patriot Collar, Pediatric, \$9.50

With the Philly Patriot Collars, simply measure the patient, adjust and lock the selected height, and apply. Either in supine or seated position, application is quick and easy.

- Restricts flexion, extension, and rotation to immobilize the cervical spine
- Multi-height adjustments (AE-720 has four heights; AE-721 has three heights)
- Injection-molded polyethylene plastic body for improved rigidity and durability
- Oversized trachea opening for quick access to carotid pulse monitoring and emergency tracheotomies
- Pre-molded level chin support maintains patient in neutral alignment; mandible support adapts to individual patient's jaw line
- Nasal cannula holders
- Open rear ventilation panel for fluid drainage, airflow, and cervical spine palpation
- Essentially flat for efficient storage
- Water resistant for use in adverse conditions
- X-ray, CT, and MRI lucent
- Clean with mild soap and water

Speedsplint^{...}

AE-1605 Speedsplint[™] Femoral Traction Splint, \$85.00

The splint can go with the patient to X-Ray or even surgery and be thrown out after. There is no need to worry about lost expensive splints.

- Includes splint, padding, harness, and groin pads
- Fits anyone up to 6'4" tall
- Has precise traction tension control
- Saves space

Morgan[®] Medi-Flow Lens

AE-1695 Morgan Medi-Flow Lens, Sterile, 12/case, \$425.00

For immediate relief of pain and definitive treatment of:

- Ocular trauma and infection
- Foreign body sensation
- Operative and pre-operative procedures

The Morgan Lens makes difficult ocular irrigation and lavage safe, simple, and effective. Early insertion of the Morgan Lens can prevent permanent ocular damage and a months of unnecessary suffering. The Morgan Lens eliminates the need for constant supervision during irrigation or lavage.

The Morgan Lens is currently used in over 4,000 emergency departments and is successful in treating hundreds of thousands of ocular injuries.

The lens, tubing, and adapter are sealed in individual peel-open packages with instructions for use printed on the front. Disposable units are sterile and ready for use. The lens is made of soft, low-density polyethylene.

AE-1697 Medi-Duct, 12/pkg., \$105.00

Optional Medi-Duct is an ocular fluidmanagement system designed for use with the Morgan Lens. When the lens is attached, solutions are carried away from the patient for easy collection.

For insertion, instill topical anesthetic. Attach syringe for lavage of I.V. set for continuous flow, using solution and rate of choice. Start the solution flowing.

Have patient look down. Insert edge of the lens under the upper lid. Have the patient look up and retract the lower lid.

Release lower lid over the lens and continue flow. Tape tube and adapter to patient's forehead to prevent accidental lens removal. Absorb outflow.

For removal, have patient look up. Retract lower lid behind interior border of the lens and hold position. Have patient look down, retract upper lid, and slide lens out.

Morgan Lens® Delivery Set

AE-1696 Morgan Lens Delivery Set, 6/box, \$70.00

The Delivery Set makes using the Morgan Lens even easier. It is no longer necessary to jury-rig separate I.V. set-ups to irrigate two eyes at the same time. Now, the lenses are simply connected to the Delivery Set and inserted using the normal procedure. The Morgan Lens Delivery Set provides the speed and efficiency needed when a patient's vision is on the line. The Morgan Lens is sold separately.

Universal Precaution Compliance Kit

AE-6398 Universal Precaution Compliance Kit, \$17.00

Designed in accordance with CDC and OSHA recommendations, this kit contains everything necessary to clean up blood, spills, and bodily fluids.

Universal Precaution Kit includes:

- Disposable protective gown
- Disposable vinyl gloves (one pair)
- Disposable mask with eye shield
- One packet of Red-Z absorbent
- Disposable scoop and scraper to pick up solidified spill

- Red biohazard disposal bag
- SaniZide[®] pre-moistened wipe for surfaces and equipment
- One P.A.W.S.® antimicrobial skin wipe for single use

Armstrong Trauma Cases

AE-1230B

AE-1230B Trauma Pack, Blue, \$190.00 AE-1230 Trauma Pack, Orange, \$190.00

Cavernous, zippered main compartment and four full-size exterior pockets. Front pocket opens to reveal generous tacked elastic, full-length interior pocket, and three large vertical pockets.

Size: 19"L x 14"W x 12"H

AE-1240

AE-1240 Breathsaver Oxygen Bag, Type "D" Cylinder, \$215.00 AE-1240LF Latex-Free Breathsaver Oxygen Bag, Red, Type "D" Cylinder, \$235.00

One of the most popular airway management bag in the industry. Fold-back lid has gusseted pocket with clear window. Padded main compartment holds "D" or "Jumbo D" tank. Fluid-proof Bottom casing extends up the sides for added protection. Has two full-length side pockets and one end pocket.

Outside Dim: 26"L x 13"W x 12"H

Please Note: Supplies shown are not included.

AE-1246 AED/Oxygen/Trauma Backpack Plus, \$390.00

Heavy-duty construction and taskspecific design ensures that this backpack delivers ease of transport and efficient deployment of AED, Oxygen, and Trauma supplies, all while keeping a slim profile. Features 1,000 denier nylon construction with all metal hardware, padded handles, and fluid-proof bottom.

Size: 211/2"H x 131/2"W x 11"D

AE-1289

AE-1290 "D" Oxygen Bag, \$140.00 AE-1289 "E" Oxygen Bag, \$170.00 Zippered bag provides immediate access to the tank, which is protected by durable padding. Contains mesh pocket to hold oxygen supplies.

"D" bag: 21"L x 8¹/2"W x 8¹/2"H "E" bag: 32"L x 8¹/2"W x 8¹/2"H

AE-1245

AE-1245 Laryngoscope Bag, Royal Blue, \$50.00

Padded case spreads completely open for quick access to blades, handles, and tubes.

Size: 14"L x 1¹/2"W x 10"H (closed)

AE-1242

AE-1242 Ultra Softbox Plus Trauma Bag, Orange, \$295.00

Features a large, semi-rigid main compartment with four removable dividers. A gusseted pocket with clear window in the lid holds loose equipment or the optional AE-1243 Ultra Meds Pack. Also includes four full-size, exterior pockets.

Size: 22"L x 14"W x 12"H

AE-1243 Ultra Meds Pack, Royal

Blue, \$65.00 (not shown) Compact, Cordura® nylon pack protects vials and ampules. Complete, fold-open design displays all areas at once for immediate access. Diced-foam blocks allow easy customization to suit your needs. Clear, vinyl pocket holds meds list. Fits in most soft trauma bags.

Size: 13"L x 3"W x 51/2"H

Armstrong Trauma Cases

AE-4704 Empty Broselow[®] Bag (outer shell only), \$315.00 Outer shell only ("Flying Carpet" not included).

18"L x 11¹/2"H x 12¹/2"D.

AE-1294 Soft Tri-Pocket Case, Orange, \$160.00 AE-1294B Blue Case, \$160.00 The ideal disaster case. Adjustable compartments and removable interior provide rapid, organized access to equipment and supplies. Three pockets are perfect for adjuncts. Three-way carry

with back pack, shoulder strap, or hand strap. 20"L x 15"W x 9"H.

AE-4825 Mini Broselow® Equipment Organizer, \$265.00 Seven empty color-coded bags permanently attached to "Flying Carpet" cloth.

Main bag: 15"L x 10"H x 6¹/2"D. Pouches: 12"L x 5"H x 2"D Flying Carpet: 30"L x 12"W

AE-1291 Standard Trauma Bag, Orange, \$70.00

Cordura[®] bag has Snaploc[™] buckles for easy access. Interior tool holders and separate compartments keep equipment in place. Two wing pouches and dual pockets hold accessories. Includes shoulder strap. 17"L x 9"W x 7"H.

Looking for more EMS Supplies? See page 91

AE-4805 Broselow® Pediatric **Emergency Equipment Organizer**, \$450.00

Seven empty color-coded bags attached to Velcro® "Flying Carpet" cloth. Includes airway management equipment bag.

Main bag: 18"L x 11¹/2"H x 12¹/2"D. Airway bag: 14"L x 9"H x $4^{1}/2$ "D empty. Pouches: 14"L x 8"W. Broselow[®] Tape and other supplies not included.

AE-4800 Broselow[™] Pediatric Emergency Tape, 5/pkg., \$120.00

See pages 65-69 for a complete description of the innovative Broselow®/Hinkle Pediatric **Resuscitation System.**

AE-1250BV

AE-1250BV Vinyl Intubation Case, Blue, \$60.00 AE-1250V Vinyl Intubation Case, Orange, \$60.00 (not shown)

Case rolls and fastens in a tight bundle. Holds twelve endo tubes, a full set of oral airways, and a laryngoscope handle with four blades; or equipment of your choice. Unrolled dim.: 25" x 14".

CPR Manikins

Little JOETM

Extremely Sanitary

Prevents cross contamination with an individual face piece for each student and a disposable, non-rebreathing airway.

Lifelike Features

Head tilt/chin lift mobility. Plus, all essential landmarks, including navel for obstructed airway practice. Longer torso for abdominal thrusts. Realistic rib cage overlay for landmarking.

Quick Clean Up

After class, the inexpensive face pieces can be discarded, or sanitized and reused. Airways are disposable.

Durable and Portable

Built to withstand high-volume usage. Easy to transport.

AA-6100 Infant CPR Manikin, \$129.66 AA-6104 Infant CPR Manikin, 4 Pack, 499.10 AA-6150 Lungs, 50/pkg., \$22.87

Life-like features and weight allow for realistic infant CPR training. Sculpted body contours and realistic skin feel help prepare the student for real life rescues. A head that simulates the way an actual infant's head would move. Face/head tilt enhances the CPR learning experience and teaches students how to open the airway during CPR.

- Stackable torsos and heads for compact, easy transport
- Easy to clean
- Clamshell opening provides easy access
- Piston provides compression feedback on rate and depth (includes rate monitor and depth clicker)
- Compatible with AED training pads
- Anatomically correct design includes xyphoid process
- Realistic chest compressions to a 2" depth
- Realistic head tilt
- Visible chest rise with lung bag use
- Life tested to a half-million compressions
- Unique torso web design for realistic feel
- Three year warranty
- Vinyl and latex free
- Batteries not included

Manikin is equipped with a revolutionary CPR Rate Monitor that allows for instant feedback to both instructor and student regarding the rate of chest compressions. The visual feedback from the CPR Rate Monitor gives students a real life feel of delivering 100 compressions per minute.

- Breakthrough design allows instructors to set up and pack up in minutes
- Depth clicker mechanism helps students learn to use the right amount of force in order to compress the victim's chest to the correct depth

Laerdal® CPR Manikins

NEW Laerdal[®] Little Baby QCPR 4 Pack

AA-1680 Laerdal Little Baby QCPR 4 Pack, \$905.00 AA-1682 Optional SkillGuide w/Cable, \$72.00 AA-2407 Little Baby Face Masks, 6/pkg., \$66.00 AA-1685 Little Baby Airways, 24/pkg., \$25.75

Little Baby QCPR enhances infant CPR training by delivering quality CPR training with real-time and summative feedback, efficiency with multiple student monitoring, and increased engagement using a gaming element.

- Quality CPR feedback technology on compression rate, depth, recoil, chest compression fraction, hand placement, and ventilations
 - Audio crying feedback for choking training
 - Multiple student monitoring from the palm of your hand
- Gaming element to help make learning stick
- Realistic look and feel of a baby

Laerdal[®] Little Junior[™] Child QCPR Training Manikin

AA-2600 Laerdal Little Junior Child QCPR Training Manikin with Carrying Bag, \$254.00 AA-2610 Little Junior 4 Pack, \$940.00 AA-1605 Optional SkillGuide with Cable, \$72.00 AA-1615 Little Junior QCPR Upgrade Kit, \$76.30

Includes two faces, two airways, six manikin wipes, soft pack, and directions. Soft pack doubles as training mat.

The Little Junior QCPR manikin includes measurement and feedback technology that takes the guesswork out of instruction—all from the palm of your hand. Little Junior QCPR delivers real-time and summative feedback on key parameters of quality CPR using free apps for smartphones and tablets, including the QCPR Instructor App for multiple student monitoring, and the QCPR Learner App for students to monitor their own performance. The SkillGuide with Extension Cable provides a tethered feedback option, and can be used by itself or as a supplement to the apps.

Laerdal[®] Little Anne QCPR

AA-1600 Little Anne QCPR, \$264.00 AA-1604 Little Anne QCPR 4-pack, \$976.00 AA-1605 Optional SkillGuide w/Cable, \$72.00 AA-1610 Little Anne QCPR Upgrade Kit, \$76.30

Little Anne QCPR helps instructors increase effectiveness and efficiency in their courses by connecting with smartphones and tablets to deliver objective feedback and monitoring for up to multiple students at once, while creating an element of fun and engagement for students. With Little Anne QCPR, instructors can ensure quality CPR is being learned every time, with every student.

- Can be displayed on an Apple device with free download on Apple App Store or with optional SkillGuide
- Real-time feedback on compressions and ventilations
- A summary with an overall score and improvement suggestions
- Details on compression release, depth and rate, ventilation volume, and number of compressions/ventilations/cycles
- Instructors can monitor the performance of up to 6 students at once

AA-6080 ActFast™ Anti Choking Trainer, Red \$139.00

AA-6082 ActFast[™] Anti Choking Trainer, Red, 4/pkg., \$429.00

AA-6085 ActFast[™] Anti Choking Trainer, Blue (*no back pad*), \$129.00

AA-6087 ActFast[™] Anti Choking Trainer, Blue (*no back pad*), 4/pkg., \$429.00

AA-6095 ActFast[™] Anti Choking Pediatric Trainer, \$109.00.

The training vest can be used in a variety of positions to create realistic scenarios, including: standing, sitting and laying on the ground. Also, it allows the student to practice self rescue, using a counter top or chair.

- Transparent PVC airway allows user to see release of obstruction.
- Large easy snap buckles with adjustable straps. One size fits all.
- Back Pad (*Red only*) crumple zone for practicing back blows.
- Navel aids in correct hand placement.

Defib Simulators and Crisis Manikin

NEW 15-Lead Arrhythmia Simulator

AA-701 15-Lead Simulator, Zoll, \$795.00 AA-702 15-Lead Simulator, Physio Control Quick Combo, \$795.00 AA-703 15-Lead Simulator, Philips, \$795.00

Acquire 15-lead STEMI recordings with your standard 12-lead ECG monitor. Three new pre-cordial ECG snaps allow for direct viewing of the right ventricle -

through V4R - and of the posterior ventricle - through V8 and V9. STEMI rhythms include: Inferior, Inferior with right ventricular STEMI, Inferior with posterior STEMI, Anterior, Antero-septal, Antero-lateral and Anterior with RBBB.

Observe progression of T wave, ST segment and Q wave changes during STEMIs. Each STEMI can be displayed in one of three phases: hyperacute (broad, peaked T waves), acute (ST elevation) and post-acute (pathological Q waves).

Differentiate STEMIs from imposters. Common rhythms with characteristics that mimic STEMI but are not STEMIs include: LBBB, LVH, pericarditis and W-P-W. Discharge your defibrillator directly into the simulator. Use "convert" feature to convert automatically to another rhythm after defibrillation. Useful fibrillations and tachycardias include: VFib, VTach fast, VTach slow, SVT, Sinus Tach, AFib and AFlutter.

Simulate paced beats with your external pacer. Select one of five pacing capture levels: 70, 80, 90 or 100 mA, or "ignore". When your pacer's current and rate are properly adjusted, paced beats are displayed. Useful bradycardias include: Sinus Bradycardia, 2nd degree type I AV block, 2nd degree type II AV block and 3rd degree AV block.

Uses four AA alkaline batteries. Three-year warranty.

"Hands-Free" Defib Pad Adapters for Defib and CRiSis™ Manikins

For use with CRiSis Manikins and the Complete Defib Training Package.

AA-6030 Physio Control "Quik Combo"[™], **\$268.95**

AA-6021 Zoll, \$277.95

Interactive ECG/Pacing Simulator

AA-550 Interactive ECG/Pacing Simulator, \$930.95

This simulator combines defibrillator and external pacer training features with adult and pediatric ECG rhythms. Builtin circuitry allows users to practice defibrillation and external pacing with or without a manikin*. The simulator features seventeen adult and pediatric rhythms for pacing on any defibrillator. It has the ability to automatically convert from one rhythm to another when defibrillated. Uses one 9V battery.

* Extra adapter may be required.

Z02 Zoll Defib Pad Adapter, **\$210.00** Z10 Physio Quick Combo Defib Pad Adapter, **\$210.00** Z13 Philips MRx Defib Pad Adapter, **\$210.00**

AB-1700 CRiSis Patient Manikin, Complete System, \$4,999.95

- CRiSis Manikin with Airway Larry® airway management head
- I.V. training arm
- New and improved blood pressure arm

 - Simulate brachial pulse

Vascular Access

• Practice intraosseous needle insertion with aspiration of

simulated bone marrow

Airway Management

• Teach and practice bag-valve mask ventilation oral and nasal intubation, gastric tube insertion, Sellick maneuver, and LMA insertion

ECG Monitoring

• Three-lead monitoring when used with optional simulator

Prices and products are subject to change without notice.

STAT Manikin

STAT Manikin

AA-7300 STAT Manikin with Carrying Case, \$6,925.25

The STAT Manikin's body demonstrates a giant step forward in manikin design. The joints' range of motion is near human. Rib cage motion mimics lifelike respirations. Multiple pulse points demonstrate blood pressure variation.

Features:

- Twelve pulse points
- Accurate human anatomy
- CPR
- Multiple injection sites
- Advanced I.V. arm
- Oral and nasal intubation
- Four-lead monitoring
- Tongue swells
- Laryngospasms
- Cricothyrotomy
- Bilateral chest tube placement with simulated fluid discharge
- Bilateral pneumothorax relief
- Stomach distention
- I.V. arm therapy
- Defibrillation
- Arrhythmia training

The STAT Manikin comes with the AA-550 Interactive ECG/Pacing Simulator *(see page 98)*.

Shipping size: 57" x 34" x 12" Shipping weight: 100 lbs.

Z02 Zoll Defib Pad Adapter, **\$210.00** Z10 Physio Quick Combo Defib Pad Adapter, **\$210.00** Z13 Philips Defib Pad Adapter, **\$210.00**

Accepts All Airways

Bilateral Chest Tube Placement

AA-7315 Optional STAT Manikin Intraosseous Leg, \$302.95

Advanced I.V. Arm

Bilateral Pneumothorax Relief

AED and Airway Trainers

Laerdal[™] AED Trainer 2 Manikin Package

AA-1942N AED Trainer 2 with Manikin, \$638.95 AA-1940N AED Trainer 2 with Case only, \$515.00 AA-5910 Lungs, 100/pkg., \$43.00

The AED (Automated External Defibrillator) Trainer 2 makes complex defib training simple. The unit mimics the Forerunner[®] 2 and has ten preset comprehensive training scenarios available at the touch of a button.

AED Trainer 2 features:

- User interface
- Rescue voice prompt
- Adult training electrode pads

Laerdal[™] AED Trainer 3

AA-1960 Laerdal AED Trainer 3, \$399.00 AA-1961 Replacement Pads, \$34.00 AA-1963 Optional Remote Control, \$47.00

The AED Trainer 3 reflects the unique functionality of the Philips HeartStart FR3 AED. It is configured with eight realworld scenarios that have been developed in accordance with internationally recognized responder programs. They are AHA and ECC 2010 Guidelines

AA-1941 Replacement Training Electrodes, \$29.90 AA-1945 Pediatric Training Electrodes, \$29.90 AA-1943 Optional Remote Control, \$59.30

Manikin features:

- AED pad placement practice
- CPR practice
- Single-use airway/lung/face shield system
- Anatomical landmarks: sternum, rib cage, and substernal notch

compliant. Many parameters on each

scenario can be easily configured to

conform to local protocols or future

The instructor can change scenarios by

using an optical remote control.

pressing the buttons on the device or by

Guidelines updates.

Critical Care Airway Trainer

AA-3900 Critical Care Airway Trainer, \$1,603.95 AA-3910 Replacement Lungs/Stomach, 3/pkg., \$20.95

This very difficult intubation head, coupled with the CPR torso, supplies the challenges for initiating respiratory care to the critical patient. By using the features of tongue swelling and laryngospasms, the instructor creates a critical airway management scenario that requires the student to perform cricothyrotomy. In addition, two external and one internal bleeding wounds demand attention with suctioning and bleeding control.

Patient Education Tracheostomy Care Set

AB-1136 Patient Education Tracheostomy Care Set, \$1,122.95 AB-1137 Adult Manikin only with Carrying Case, \$763.95 AB-1138 Infant Manikin only with Carrying Case, \$359.95

The Adult Manikin includes oral and nasal passages, the pharynx, epiglottis, trachea, esophagus, tracheostomy site, and cricoid cartilage. Students can practice suctioning techniques, cuff inflation, dressing changes, and other techniques. The Infant Manikin can be used to teach parents and caregivers basic tracheostomy care skills.

AB-1136 includes one adult and one infant manikin, one adult and one infant tracheostomy tube, an instruction guide, and a hard carrying case.

ALS Trainers

AA-4400 Adult ALS Trainer Full Body with Simulator (see AA-550, pg. 98), \$3,280.00 AA-4405 Adult ALS Trainer Full Body only, \$2,935.00 AA-4410 Adult ALS Trainer Torso with Simulator (see AA-550, pg. 98), \$2,830.00

The Adult ALS Trainer is a comprehensive, megacode manikin. It has an airway management trainer for both oral and nasal intubation. Practice airway management procedures for bag valve mask, Combitube[®], and LMA. Laryngospasms can also be simulated.

All airway landmarks are realistically featured.

When the ALS Trainer is used with a simulator, standard ECG monitoring can be performed, as well as defibrillation, cardioversion, and pacing. The manikin also includes an I.V. injection arm and

AA-4415 Adult ALS Trainer Torso only, \$2,600.00 Z02 Zoll Defib Pad Adapter, \$210.00 Z10 Physio Quick Combo Defib Pad Adapter, \$210.00 Z13 Philips MRx Defib Pad Adapter, \$210.00

several I.M. injection sites located on the deltoid and thighs.

See AA-550 on page 98 for Simulator features.

Twelve-Lead ECG Placement Trainer

AA-3400 Twelve-Lead ECG Placement Trainer, \$1,275.00

A replica of a human thorax, this manikin has all appropriate landmarks necessary to train students in proper placement of ECG leads. Using reusable, color-coded magnets for leads, students learn correct placement as the appropriate LED lights up. A lighted signal also indicates when all leads are placed correctly.

The AA-3400 can be used with a rhythm simulator to enhance training by adding ECG readings that can be viewed on your monitor or printed on your twelve-lead ECG machine.

> Visit Our Website At www.armstrongmedical.com

Intubation Trainers

Armstrong Intubation Manikin

AA-3000 Armstrong Adult Intubation Manikin with Case, \$1,100.00

The Adult Intubation Manikin's head extends for correct positioning, the lungs have a realistic compliance, and the skin is soft.

Practice bag valve mask ventilations, oral or nasal intubation, EOA, Combitube®, and other airway management techniques. Works well with curved or straight laryngoscope blades. Comes with realistic cricoid cartilage (for cricoid

pressure) and realistic teeth. Laryngospasms can be simulated.

Manikin features oral pharynx, tongue, epiglottis, vocal cords, stomach, trachea, right and left bronchus, esophagus with stomach, articulating jaw, upper and lower teeth, bilateral nasal passages, and soft face skin.

AA-3000L Lungs and Stomach, 3/pkg., \$65.00

Larry Intubation Trainer

AB-1875 Larry Head with Mounting Board, \$1,054.95
Includes mounting board, case, and lubricant.
AB-1830 Larry Torso Manikin (not pictured), \$1,425.95
Disposable lower airway, case, and lubricant.
AB-1870 Larry Head only (not pictured), \$725.95

- Find more tracheal space for improved maneuvering
- Apply cricoid pressure, change the position of the trachea, and close the

esophagus in order to practice the Sellick maneuver

Attaches to either CPARLENE® or Resusci® Anne™ CPR manikins.

AA-3000

Advanced Larry Intubation Trainer

AB-1650 Advanced Larry, \$1,460.95 AB-1655 Advanced Larry Head with Stand, \$1,271.95

These trainers offer tongue swelling and laryngospasms in addition to all the features of the standard models (*see above*). Advanced Larry simulates a non-anesthetized patient for practicing intubation, ventilation, suction, and CPR techniques. Practice oral, nasal, and digital intubation, as well as ET, EOA, PTL, LMA, EGTA, and Combitube® insertion. Applying pressure to the cricoid cartilage changes the position of the trachea and closes the esophagus to allow realistic practice of the Sellick maneuver. With its slightly anterior position, swelling tongue, and vocal cords, Advanced Larry is perfect for any level of training.

Laerdal[™] Airway Management Trainer

AA-3100 Laerdal Airway Management Trainer, \$2,349.00

Includes mounting board, separate larynx model, spray lubricant, sanitation kit, and hard case. Simulates a nonanesthetized patient for teaching intubation, ventilation, and suction.

Intubation: Practice esophageal, bronchial, oro- and naso-tracheal, and oro- and naso-pharyngeal intubation. Features full-range head motion and a complete realistic airway anatomy. Tube placement can be checked by visual inspection of lung expansion during ventilation, auscultation of breath sounds, or bronchoscopic evaluation of tip position.

Ventilation: Allows practice for correctly establishing an open airway. Manual or mouth-to-mask resuscitators can be used.

Foreign Body Removal: Practice oropharyngeal and tracheal suctioning.

Intubation Trainers

AA-3050

Child Intubation

AA-3025 Three-Year-Old Airway Intubation Head with Carrying Bag, \$778.00

AA-3025 features both realistic size and anatomy for training and practicing airway management skills on a child. Quality and affordability make the AA-3025 indispensable for training.

Manikin head comes with lubricant and a carrying bag.

Equipment Sizes:

• Laryngoscope Blade: #2

Infant Intubation

AA-3050 Infant Airway Intubation Head with Carrying Bag, \$778.00

AA-3050 features both realistic size and anatomy for training and practicing airway management skills on an infant. Represents newborn - 1-month-old child.

Manikin head comes with lubricant and a carrying bag.

Quality and affordability make the AA-3050 an ideal training tool.

Equipment Sizes: • Laryngoscope Blade: #0

- Endotracheal Tube: 3.0 mm
- Nasotracheal Tube: 3.0 mm
- Features:
- Landmarks include uvula, vocal cords, glottis, epiglottis, larynx, arytenoid cartilage, trachea, esophagus, inflatable lungs, and stomach
- Vocal cords, highlighted in white, provide easy laryngoscope viewing

• Endotracheal Tube: 3.5 mm

Nasotracheal Tube: 2.5 mm

Features:

- Landmarks include uvula, vocal cords, glottis, epiglottis, larynx, arytenoid cartilage, trachea, esophagus, inflatable lungs, and stomach
- Vocal cords, highlighted in white, provide easy laryngoscope viewing

Child Airway Management Trainer

AB-1900 Eight-Year-Old Child Airway Management Trainer with Hard Case, \$798.00

This anatomically correct, eight-year-old child manikin is perfect for practicing pediatric airway management skills, including oral, digital, and nasal intubation, and suction. Landmarks include nostrils, teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false and true cords, cricoid ring, tracheal rings, trachea, esophagus, lungs, and stomach.

- Equipment Sizes:
- Laryngoscope Blade: #2
- Endotracheal Tube: 4.5 mm
- Nasotracheal Tube: 3.0-3.5 mm

Infant Airway Management Trainer

AB-2000 Infant Airway

Management Trainer, \$727.00 Mounted on a stand. Includes stand, hard case, spray lubricant, lungs, and stomach. Represents a 3-month-old child.

Equipment Sizes:

- Laryngoscope Blade: #1
- Endotracheal Tube: 4 mm

AB-2010 Infant Airway Management, Head Only, \$521.00 Can be attached to Resusci® Baby Infant CPR Manikin.

Infant Airway Management Trainer features realistic size and anatomy for practicing airway management skills on an infant.

Procedure and Training Simulators

Laerdal[™] Infant Intubation Model

AA-3200 Laerdal Infant Intubation Model with Spray Lubricant and Protective Cover, \$767.00

Features realistic oropharynx, tongue, epiglottis, larvnx, vocal cords, trachea, and a detachable tongue and airway set that allows for simple replacement of these parts. Correct tube placement can be visually checked via the transparent

trachea or the practical inflation test. Represents a three month old.

Equipment Sizes: Laryngoscope Blade: #1 Endotracheal Tube: up to 4.0 mm

AA-3250

Laerdal[™] Neonatal Intubation Trainer

AA-3250 Neonatal Intubation Trainer, \$625.00

The Neonatal Intubation Trainer provides practice of intubation skills on a newborn baby. Robust and realistic, this model allows students to undertake training that is directly transferable to the clinical setting.

- Realistic anatomy
- Oral and nasal intubation
- Bag valve mask ventilation
- Correct tube placement can be checked by practical inflation tests

Complete Auscultation Training System

AB-2710 Complete Auscultation Training System (Posterior Board not included), \$4,230.95

The Complete Auscultation System includes an Auscultation Trainer (see below), a Smartscope[™], an Auscultation Board with Case, a remote control, and an amplifier/speaker system. Coupled with the Auscultation Trainer and Smartscope, the Auscultation Board guides students through the transition from anatomical drawings to a three-dimensional torso. Using the same technology as the Auscultation Trainer, the Auscultation Board will cause the Smartscope to emit various sounds dependent on the location of the stethoscope.

Auscultation Trainer and Smartscope™

AB-2700 Auscultation Trainer and Smartscope, \$3,407.95 AB-2705 Additional Smartscope, \$1,233.95

Lung sounds include normal, wheeze, mono wheeze, fine crackle, coarse crackle, rhonchi crackle, stridor, cavernous, bronchial, pulmonary edema, friction rub, egophony, and pectoriloquy.

Heart sounds include normal, aortic regurgitation, mitral stenosis, pulmonary stenosis, holosystolic, midsystolic, S3 gallup, S4 gallup, systolic click, atrial septic defect, PDA, and VSD.

Additional features:

- Invisible auscultation sites
- Palpable landmarks
- Completely wireless
- Remote controlled
- No internal speakers
- Sounds vary at different sites
- Color-coded heart and lung sound sites in manual
- Includes a hard storage case

Airway Management Head and I.V. Models

Adult Deluxe Airway Management Trainer

AA-3310 Adult Deluxe Airway Management Trainer, \$1,752.95

This adult airway trainer utilizes lifelike skin that stretches more than human skin and will not be damaged by aggressive intubation. Practice cricothyreotomy and other surgical techniques. The feel and anatomy emphasizing accurate visualization features makes this trainer the choice for advanced airway management with the convenience of board mounting. Features include laryngospasm and tongue edema. Both lungs and stomach are visible for easy determination of successful intubation. All the anatomical landmarks are shown and the vocal cords are in a neutral position and highlighted for easy viewing. The upper teeth break out if inappropriate technique is applied during intubations. The cricoid area replacement skin allows for an economical way to teach and practice surgical techniques for cricothyreotomy.

Intradermal Injection Simulator

AB-1010 Intradermal Injection Simulator, \$265.95

Practice intradermal injections safely and conveniently with the Intradermal Injection Simulator.

This unit consists of a molded arm section from the wrist to just below the elbow. Vinyl skin provides a realistic feel and appearance for a successful training experience.

Unit features:

- Eight sights for intracutaneous injections
- Skin welts which form during proper fluid injection
- Reusable practice sights

The Injection Simulator includes sealant, a syringe, a teaching guide, and a portable storage box.

Advanced 4-Vein Venipuncture Arm Pad

AA-9675 Advanced 4-Vein Venipuncture Arm Pad, \$361.50

Practice venipuncture techniques and "no stick" I.V. catheter placements.

The latex-free Arm Pad features realistic blue veins below a tissue-like pad. The Arm Pad's skin rolls when the vein is palpated. Veins are present in three different sizes and occur at various depths. Increase difficulty of procedure and thus improve skills.

This lightweight, portable, economical, non-staining training model is an excellent alternative to larger, heavier, more expensive models.

Ultrasound Phantom

AA-9825 Ultrasound Phantom, \$468.00 AA-9826 Simulated Blood, 8 oz., \$29.00

The phantom provides unmatched training opportunities for ultrasound guided vascular accessing. Prefilled with stain resistant blood, this model also contains three different sized vessels for additional learning.

- Can be accessed numerous times and is self healing
- Realistic movement of soft tissue can be observed as needle tip enters the vessel
- Flesh toned, curved contour helps transducer positioning

Vascular Trainers

Chester Chest[™] REALISTIC DERMALIKE[™] SKIN

AA-9800 Chester Chest, \$919.00

Life-size torso model for teaching and practicing the most common, long-term vascular access routes.

- Implanted ports
- External central catheters
- Peripheral central catheters

Chester Chest has three accessing inserts.

- Tilting/tipping ports
- Wandering/shifting ports
- Deeply placed ports

Practice fluid infusion, blood withdrawal, subclavian and external jugular line placement, and heparinization.

AA-9801 Case for Chester Chest, \$103.00

405 Replacement Chest Skin for Chester Chest, **\$123.00**

AA-9806 Replacement Arm with Single Lumen Port, \$308.00 (shown)

410 Optional Triple Lumen Port, \$74.25 (shown)

454 Optional Connector, \$25.40 (shown) *Required if ordering 410.

417 Optional Implanted Peripheral Port, \$99.50 (shown)

Central Lines Injection Trainer

AB-1145 Central Venous Cannulation Simulator, \$1,072.95

Designed for ACLS and ATLS testing stations. Landmarks include clavicle, sternal notch, and sternocleidomastoid. The trainer shows muscle and bone section, subclavian, internal jugular, external jugular, and carotid.

Includes replaceable skin, tubing sealant, one quart of imitation blood, needles, and a case.

- Subclavian vein approaches
- Internal jugular vein approaches
- External jugular vein approaches
- Swan-Ganz catheter insertion

AB-1146 Cannulation Skin and Vein Replacement Kit, **\$234.95**

AB-1147 Muscle and Bone Replacement, \$253.95

Peter PICC[™] REALISTIC DERMALIKE[™] SKIN

AA-9815 Peter PICC[™] Central Catheter Line Insertion Simulator with Soft Case, \$810.00

The only teaching model that allows the practice of placing peripherally inserted central catheter lines (PICC lines).

Model features anatomically correct cephalic, basilic, median basilic, jugular, subclavian, and superior vena cava. Also features a movable chin to simulate occlusion of the jugular to prevent the PICC line from taking this route. Standard I.V. catheter placement is also possible with Peter PICC.

Measure proper catheter length using palpable ribs or measure catheter length outside the body. Confirm proper placement by viewing distal tip of the catheter in the viewable superior vena cava. Identify underlying veins below the replacement skin.

Arterial Puncture Arm

AB-1005 Adult Arterial Puncture Arm, \$665.95

This arm is ideal for practicing to draw arterial blood samples at either radial or brachial sites. The instructor can control pressure to produce a lifelike backflow of blood in the syringe.

AB-1007 Arterial Arm Replacement Skin with One Set of Arteries, \$183.95

Prices and products are subject to change without notice.

I.V. Arm Trainers and Pneumothorax Simulator

I.V. Arm

AB-1000 I.V. Arm, Caucasian, \$639.95 AB-1001 I.V. Arm, African-American, \$639.95

Realistic skin rolls as you palpate the vein and the characteristic "pop" can be felt as the needle penetrates the vein. Multiple access points allow practice for drawing blood, intramuscular injections, I.V. catheter insertions, and infusions. Comes with a soft carrying case.

AB-1002 Replacement Skin and Vein

- Kit, Caucasian, \$149.00
- AB-1003 Replacement Skin and Vein
- Kit, African-American, \$149.00
- AB-1004 Replacement Vein, \$18.00

I.V. Arm and Hand

AA-4340 I.V. Training Arm and I.V. Training Hand, \$535.95

This is a fully functional I.V. training arm and hand. The student can palpate the arm and hand, which are made of a supple, resilient, lifelike skin. The vein can be located, the needle introduced, and then blood withdrawn or fluid injected. Simulated blood and a carrying tray are included.

AA-4346 I.V. Arm Only, \$317.95

AA-4347 I.V. Hand Only, \$317.95 141R Skin for Right Hand, \$57.95 142 Skin for Arm, \$57.95 143 5-ft. Vein for Hand and Arm, \$26.95 144 I.V. Reservoir, \$15.95 225 Blood Powder (for 1 gallon), \$20.95

\$212.95

\$213.95

Pneumothorax Simulator

AA-9500 Pneumothorax Simulator, \$702.95

This simulated torso helps emergency personnel learn the life-saving techniques associated with pneumothorax injuries.

- Life size
- Features rib cage, liner, and vinyl skin
- Ideal for PHTLS and EMT-P classes
- Excellent review for ER, OR, or ICU

The pneumothorax simulator includes a pump assembly for lung inflation, a dual

lung, a rib cage, replaceable skin, and a carrying bag.

The self-sealing dual lungs may be punctured approximately 75 to 100 times each, allowing double usage from original and replacement lungs. Procedural needle is not included.

Replacement Parts: 1805 Replacement Lung, \$50.95 1807 Outer Skin, \$145.95

Training Simulators

Intraosseous Leg

AA-7310 Intraosseous Leg with Stand, \$334.95

Intraosseous access to the proximal tibia is offered with the I/O Leg Adult STAT Simulator. Use the I/O Leg to enhance training and understanding of procedures associated with B.I.G.[™] and EZ-IO[™] devices. This I/O device is not fluid capable and no blood source is accessible through the injection site.

Use in conjunction with STAT Man (see page 100).

Aspiration Needles

AE-1715 JAMSHIDI® Disposable Illinois Sternal/Iliac Aspiration Needle, 15 Gauge, \$25.00 15 gauge adjustable length: 3/8" - 17/8" AB-1160 Intraosseous Infusion Simulator, \$795.95

Intraosseous Infusion Simulator

The Intraosseous Infusion Simulator enables students to practice intraosseous infusion with incredible accuracy and realism.

Provides a very accurate and consistent simulation of procedure. Due to the innovative bone design, students can palpate landmarks and puncture each bone. To decrease replacement costs, bones have been designed so all four sides can be punctured multiple times.

on Simulator, \$795.95

Includes a case, ten bones, two pairs of replacement leg skins, and accessories.

AB-1161 Replacement Bones, 10/pkg., **\$165.95** Each side of the four-sided bone can be punctured approximately 4-6 times.

AB-1162 Replacement Skins, 4/pkg. (2 pair), **\$100.95**

AE-1718 JAMSHIDI® Disposable Illinois Sternal/Iliac Aspiration Needle, 18 Gauge, \$25.00 18 gauge adjustable length: ⁹/16" - 1¹/2"

Humerus Intraosseous (IO) Trainer

AA-3600 Humerus Intraosseous (IO) Trainer, \$411.95 AA-3603 Replacement Injection Pads, 3/pkg., \$104.95

The Humerus IO Trainer is the perfect tool to train the access procedure for fluid management. Humerus access is now accepted as the best alternative when IV access cannot be obtained. This trainer presents three orientations that can be demonstrated to provide the correct simulation for application. The realistic trainer includes the correct hallmarks, which are needed to provide accurate and safe access for fluid administration. The trainer has an easy-to-access replacement bone section supporting rapid-fire training, while presenting the realism needed to make training effective.

Procedure Simulators and Casualty Simulation Kits

Intramuscular Injection Aid

AB-1025 Intramuscular Injection Simulator, \$744.95

This is the perfect volunteer for training health care students in the proper procedure for administering intramuscular injections. One buttock is shown dissected to reveal the major muscles, nerves, and vessels. The other side offers all the bony landmarks used to identify the desired gluteal injection area, including the superior end of the femur, the posterior and anterior superior iliac spines, and the sacrum. Lateral injections in the thigh can also be demonstrated and practiced.

Skin texture, muscle texture, bone shape, and position all realistically resemble a live patient. Perforation of the tissue with a needle replicates the feeling of administering an actual injection.

Includes syringes, a teaching guide, and a carrying case.

Wound Care Simulator

AA-9680 Seymour II Wound Care Simulator, 575.00 AA-9681 Optional Carrying Case, \$93.00

All four stages of pressure ulcers are displayed, some with the additional complications of undermining, tunneling, sinus tract, slough, infection, and exposed bone. Also displayed are a suspected deep tissue injury, unstageable full eschar/slough wound, and a 5 $^{1}/^{2"}$ dehisced wound. The Stage III and Stage IV are positioned so that a "bridging"

Casualty Simulation Kits

AA-4600 EMT Casualty Simulation Kit, \$1,336.95

This kit contains everything necessary to stage incredibly realistic casualty scenarios. This 95-piece kit has burns, lacerations, compound fractures, gunshot wounds, eviscerations, and amputations. It also includes several varieties of make-up, simulated blood, and adhesives, so any injury can be represented. Packed in a rugged carrying case. dressing for use with a vacuum assisted closure and negative pressure wound therapy devices can be demonstrated and practiced. You are also able to demonstrate and practice wound cleansing, classification, staging, and assessment, as well as the measuring of wound length, depth, undermining, and tunneling.

Deluxe Casualty Simulation Kit

AA-4615 Deluxe Casualty Simulation Kit, \$943.95

The Deluxe Casualty Simulation Kit contains seven bleeding strap-on wounds and fifteen never before seen moulage stick on wounds. The full line of accessories allows you to create seventy individual wounds. Wounds include lacerations, fractures, burns, projectile entry, and much more. You can then use the included make up to create realism in your evolutions. The kit comes packaged in a carry case and contains instructions.

AA-4625 Multiple Casualty Simulation Kit, \$444.95

This budget-conscious alternative is a toned down version of the EMT Casualty Simulation Kit. It is designed for intermediate and advanced first aid courses. It features compound fractures, an open amputation, a sucking chest wound, a gunshot wound, lacerations, simulated blood, adhesives, grease paint, reservoirs and pumps, sprayer, and an instruction guide.

Trauma and Rescue Training

Prepare For The Worst

Terry Trauma Manikin™

AA-7200 Terry Trauma Adult Trauma and CPR Manikin, \$1,750.00 AA-8300 Terry Trauma Carrying Case, \$210.00

Complete with burns, lacerations, and broken bones, Terry Trauma offers realistic experience in identification, assessment, treatment, and transport of disaster victims. His flexible joints make him perfect for any kind of rescue, extrication, immobilization, or restraint.

Terry comes with two heads, a rigid rescue head and a second head for sanitary CPR training. He also includes twelve moulage pumps, simulated blood, make-up blood, CPR faces, airways and lungs, a chest/skin overlay, and clothing. Weighs 35 lbs.

Use any of the following wounds for a custom disaster scenario:

Rescue Randy[™]

AA-7500 Rescue Randy, 5'5" Ht., 55 lbs., \$1,050.95 AA-7505 Combat Challenge Randy, 6' Ht., 55 lbs., \$1,145.95 AA-7550 Rescue Randy, 5'5" Ht., 105 lbs., \$1,153.95 AA-7555 Combat Challenge Randy, 6' Ht., 105 lbs., \$1,282.95 AA-7575 I.A.F.F. Rescue Randy with Additional Reinforcements, 6'1", 165 lbs. (Does not include pants), \$1,632.95 AA-8300 Soft Carrying Case for 5'5" Manikin, \$210.00 AA-7570 Soft Carrying Case for 6' Manikin, \$199.00

Rescue Randy is a rugged, life-size adult manikin designed to simulate victims for emergency training programs. Randy's extra-tough, steel-framed body and flexible major joints can be flexed to fit any rescue scenario.

Rescue Randy is filled with a weighted foam that emulates both the weight and resiliency of a human body.

With the help of the I.A.F.F., a Rescue

- ✓ Sucking chest wound
- ✓ Forehead and forearm lacerations
- ✓ Broken clavicle with seat belt contusion
- ✓ 2nd and 3rd degree burns of the face, hand, forearm, chest, and back
- ✓ Protruding intestines
- ✓ Compound fractures
- Jaw wound
- ✔ Projectile entry and exit on arm
- ✓ Impalement of the lower leg
- ✓ Crushed foot

Randy Manikin was developed which includes additional reinforcement for increased durability.

Ideal for training exercises:

- Extrication of victims from vehicles
- Fire rescue from smoke-filled rooms
- Removal of victims from accidents
- Application of anti-shock trousers

- Immobilization/restraint techniques
- Suspended victim scenarios
- ✔ EXTRA WEIGHT can be added to Randy at \$6.50/lb.

1112 Weighted Vest, 20 lbs., \$283.95 1115 Weighted Vest, 40 lbs., \$314.95

X-ray Positioning Manikin

X-Ray Positioning Manikin

AA-7800 X-ray Positioning Manikin, \$14,950.00 AA-8300 Manikin Storage Soft Case, \$210.00 (see page 97)

The X-ray Positioning Manikin allows students of radiography to repeatedly practice any standard projection without discomfort or danger to patients or themselves.

The manikin lies naturally in the neutral, prone, or supine positions. With the use of positioning aids, it is possible to place the manikin in other postures for all standard projections. This life-size, human figure contains a fully-flexible, articulated skeleton made of a specially formulated polyurethane for realistic x-rays. No metal parts have been used in the articulation of the skeleton. The skin surface and internal organs (heart, larynx, lungs, and kidneys) are constructed of radiolucent materials.

The manikin can be positioned and for a whole body CT investigation. Good

images in terms of body outline can be obtained. Certain areas of the skeleton structure e.g. thoracic vertebrae and the head of the femur gave similar values to the typical patient. NOTE: As the manikin is very different from the human body in terms of attenuation, it cannot be used for training in or practice of exposure control.

Manikin weighs approx. 30 lbs.

Life-Size Human Figure

Geri and Keri

Geri[™] and Keri[™]

AB-2400 Geri Geriatric Manikin, \$2,099.95 AB-2500 Keri Age-Generic Manikin, \$2,099.95

Realistic, Full-Featured Geriatric and Nursing Manikins

More Than Thirty-Five Procedures Can Be Practiced

• Procedures

Urinary catheterization, enema administration, douching, eye and ear irrigation, intramuscular injection, oral and nasal lavage, gavage, and suctioning.

• Care

Ostomy care, tracheostomy care, hair washing, patient transfer and positioning, denture removal, hearing aid removal and insertion, bed baths, and clothing changes.

• Superior range of motion

Trunk, shoulders, elbows, wrists, fingers, neck, hip, knees, ankles, and toes all bend and flex realistically. Each manikin weighs 27 lbs.

• Exams

Prostate exam, pap smear, visual inspection of ulcers and moles, and dilated pupil comparison.

Visit Our Website At www.armstrongmedical.com

Blood Pressure Arm for Geri™ and Keri™ AB-1035M Blood Pressure Arm for Geri and Keri, \$1,264.95

Reproduces the five Korotkoff sounds and allows the instructor to vary systolic and diastolic levels, pulse rate, volume, and auscultatory gap.

IV Arm for Geri[™] and Keri[™]

AB-1000M IV Arm for Geri and Keri, \$693.95

Features replaceable skins and latex veins that actually roll when palpated. A realistic flashback confirms proper needle placement, and the shoulder can be used for intramuscular injection training.

Grandma Chase™

Please note that the walker is not included and the manikin cannot stand without support from personnel.

Grandma Chase[™] was first developed by Dr. Chase around the turn of the century when a group of nurses asked him if he would create a training aid that they could use to teach patient care.

Today Grandma Chase[™] has evolved into one of the most comprehensive patient care manikins and helps meet the ever changing challenges in training nursing students.

Practice stoma and ulcer care, hygiene, patient transfer, and other basic nursing skills on this versatile manikin.

Grandma Chase Patient Care Manikin

AA-8500 Grandma Chase, \$1,325.00

Includes sweat suit and interchangeable genitalia in a carrying case.

Training Applications:

• Patient transfer/handling

Trains for changing occupied beds, changing patients' clothing, positioning in chairs and wheelchairs, transfer from bed to chair, assisting patients to bedside commode, prepping and positioning a patient for surgery, and assisted bedpan use.

• Patient hygiene

Trains for bed baths, flossing and brushing teeth, decubitus ulcer care, washing and combing hair, shaving, and fingernail care.

• Other applications

Trains for bandaging fingers and toes, administering liquid feedings, catheter insertion, and ostomy care.

Manikin Features:

• Head and hair

The neck is flexible. The grey hair can be shampooed and combed.

• Nose and mouth

Either can be used for stomach tube insertion. Teeth can be flossed and brushed.

• Eyes and ears

One ear accepts a hearing aid. Ears can be cleaned with dry cloth or cotton swab. Both eyes can be irrigated with eye drops and are removable.

• Hands and toes

Individual fingers and toes make Grandma Chase perfect for bandaging practice.

• Male and female genitalia

Both are provided and held in place with Velcro[®]. Catheterization or a vaginal douche can be simulated without passing fluid. Perineal care can be practiced.

• Ioints

Manikin bends at the elbow, knee, shoulder, and hip.

• Decubitus ulcer

A foam decubitus ulcer is included and can be placed anywhere on the manikin to simulate a bed sore.

• Other features

Grandma Chase also comes with a tracheostomy, a rectum that accepts rectal thermometers or water enemas, and an ostomy stoma. Manikin weighs 38 lbs.

GREAT FOR LONG-TERM, GERIATRIC, OR CONVALESCENT CARE.

Advanced Grandma Chase[™]

Advanced Training Manikin

AA-8501 Advanced Grandma Chase with Case, Gown, and Interchangeable Male/Female Genitalia, \$2,440.00

Advanced Grandma Chase is the most comprehensive patient care manikin available. Designed specifically for nurse training programs, this lifelike, durable manikin allows high-quality practice and instruction. Advanced Grandma Chase offers all the realism of the Basic Grandma Chase manikin except tracheostomy, plus the added features below.

New Hands-on Training Features:

- Carotid pulse
- Full-functioning airway with tongue, epiglottis, esophagus, and trachea with vocal cords
- Right and left bronchus for assessing intubation skills
- Articulating jaw
- Chest compresses for CPR
- Intramuscular injection sites at the deltoids, right gluteal muscle, and at the thighs
- I.V. practice capability on right forearm and dorsal side of right hand
- Interchangeable male/female genitalia with full-functioning catheterization – voids fluids
- Enema capability
- Stomach reservoir
- Lightweight and portable with detachable arms and legs

Wheelchair and glasses are not included.

I.V. Practice Airway Management AA-8505 Replacement I.V. Arm and Hand, \$309.954024 Replacement Skin for I.V. Arm, \$85.004026 Replacement Veins for I.V. Arm, \$43.00

INCLUDES FREE MANIKIN SOFT STORAGE CASE!

Ideal For Nurse Training Programs

Multiple Injection Sites

Pediatric IV Arm and Obstetric Manikins

Pediatric I.V. Arm

AB-1015 Pediatric I.V. Arm, \$463.95

Practice venipuncture and intramuscular injection techniques used with children. Soft foam is used to simulate the deltoid muscle. Simulated bone in the shoulder defines and limits the injection area. Includes a blood donor set, an infusion set, a 3cc syringe, 1 pint of simulated blood, a teaching guide, and a carrying case.

AB-1016 Replacement Skin and Vein Set, \$153.95

O.B. Manikins

AA-9505 Deluxe O.B. Manikin, Caucasian, \$776.95 AA-9505B Deluxe O.B. Manikin, African-American, \$776.95 AA-9560 Basic O.B. Manikin, Caucasian, \$707.95 AA-9560B Basic O.B. Manikin, African-American, \$707.95

Realistically practice emergency childbirth techniques with this lifelike O.B. manikin.

- Opaque and transparent overlays
- Vertex, normal, and breech delivery
- Umbilical cords to clamp and cut

Includes disposable umbilical cords, clamps, an extra vulva, a transparent overlay, a skin-tone overlay, simulated blood powder, and a carrying case.

The Deluxe Model also includes a pregnant belly overlay for palpating the fetus (Leopold Maneuver).

Forceps OB Delivery Manikin

AA-9550 Forceps OB Delivery Manikin, \$991.95

Anatomically correct pelvic model with premature and full term fetuses for practicing forceps and vacuum assist delivery. Includes simulated blood powder, an extra vulva, and a soft carrying bag. Pregnant belly overlay and transparent overlay can be added to this manikin.

- Realistic practice of delivery techniques (forceps, vacuum assist)
- Lifelike pelvic cavity
- Removable abdominal overlay
- Soft skin vulva (anatomically correct)
- Two infant fetuses (premature and full term with fontanel and cranial sutures)

Eva[™] Pelvic Exam Model

AA-9540 Eva[™] Pelvic Exam Set with Case, \$820.95

Eva can be used for anatomical instruction, abdominal palpation, speculum instruction, or advanced tactile comparisons.

Covered in soft, easy-to-clean vinyl, Eva offers detailed and lifelike features for realistic simulation.

Eva includes nine interchangeable inserts:

- Normal cervix
- Normal parous cervix
- Cervix with endocervical polyp
- Cervix with ectropion characteristics
- Cervix with neoplasia (carcinoma)
- Normal uterus
- Pregnant uterus (ten weeks)
- Two adnexal masses

Training Simulators

NEW Neonate Simulator with ECG

AB-2100 Neonate Simulator with ECG, \$2,538.95

- Defibrillation shock can be delivered through manikin when using a simulator
- Connect defibrillator/external pacer to simulator using adapters
- Built-in circuitry allows you to defibrillate and pace directly into the ECG simulator and observe ECG rhythms through the PADS connector
- Convert feature
- Select another rhythm to run immediately after defib discharge
- Pacing can be done on any manufacturer's defibrillator
- Battery saver feature powers-off simulator automatically when not in use
- 6 waveforms
- 17 adult/pediatric rhythms

Features:

- Airway, breathing, intubation, and ventilation
- Birth anomalies
- Chest tube placement
- CPR
- ECG simulation
- Gastrointestinal (GI) tube
- Interchangeable genitalia
- Intraosseous infusion
- IV hand and foot
- Observation and measurement

- Palpable manual pulse points in 7 locations
- Patent umbilicus with venous and arterial access
- PICC site in arm
- Urinary catheterization

Includes:

- Airways, 2 standard and advanced
- Baby powder
- Blood
- Carry bag

- Defibrillation chest
- Intraosseous bones and skin
- IV bag
- IV skin and veins for hand and foot
- Male and female genitalia
- Myelomeningocele
- Needles
- Omphalocele
- Umbilicus
- Instruction manual
- 5-year warranty

Nita Newborn[™] Training Aid

AA-9850 Nita Newborn with Soft Carrying Case, \$723.00

4-lbs., 16" female manikin for practicing vascular access in infants and newborns. Permits accessing, securing, dressing, site care, and maintenance for venipuncture, central catheters, PICC lines, and umbilical catheters. Nasal and oral openings allow placement of nasal cannulas, NG tubes, and feeding tubes.

Skin rolls as you palpate the vein and backflow confirms needle location. Self-sealing veins permit withdrawal, infusion, and heparinization. Numerous veins are accessible.

Includes a fluid bag with attached tubing, simulated blood, a diaper, and a case.

Procedure Simulators

Eva[™] Pelvic Exam Model

AA-9540 Eva[™] Pelvic Exam Set with Case, \$820.95

Eva can be used for anatomical instruction, abdominal palpation, speculum instruction, or advanced tactile comparisons.

Covered in soft, easy-to-clean vinyl, Eva offers detailed and lifelike features for realistic simulation.

Normal resistance and pressure are

through the urethra, past the sphincter,

and into the bladder. Fluid then passes

through the catheter as it does with a

This Female Catheterization Simulator

comes with lubricant, catheters, a

teaching guide, and a carrying case.

experienced as the catheter passes

real patient.

Eva includes nine interchangeable inserts:

- Normal cervix
- Normal parous cervix
- Cervix with endocervical polyp
- Cervix with ectropion characteristics
- Cervix with neoplasia (carcinoma)

AB-1045

- Normal uterus
- Pregnant uterus (ten weeks)
- Two adnexal masses

Female Catheter Simulator

AB-1045 Female Catheter Simulator in Carrying Case, \$725.95

Simulates the torso of a middle aged woman properly positioned for catheterization. External genitalia and perineum are lifelike and the labia minora can be spread to reveal the clitoris, urethral opening, and vaginal introitus.

Inside there is a bladder reservoir, urethra, and a simulated urethral sphincter.

Male Catheterization Simulator

AB-1050 Male Catheterization Simulator, \$740.95

A lubricated catheter can be inserted in the urethral orifice, passed through the urethra, and entered into the bladder. Fluid flows from the catheter when the bladder is successfully entered. The normal restrictions caused by the mucosal folds, the bulbous urethra, and the internal urethral sphincter are present. **or, \$740.95** The simulator teaches proper positioning and movement of the penis for catheterization with a minimum of patient discomfort.

The Male Catheterization Simulator comes with lubricant, six catheters, a teaching guide, and a carrying case.

Cath Trainers

AA-4700 Male Catheterization Trainer, \$315.95 AA-4725 Female Catheterization Trainer, \$315.95

Trainers have realistic feel and flexibility. 16 FR catheter can be used to demonstrate balloon inflation procedures. A fluid reservoir allows for urine output upon successful completion of procedure. Instructors are able to teach sterile technique for catheter insertion/removal, as well as patient prep for the procedure.

CPR Microshield, Microkey, and Micromask

AE-5210 CPR Microshield[™] in Sealed Pouch, 10/box, \$80.00 AE-5215 CPR Microshield Protection Pack with Gloves, 10/box, \$95.00 Waterproof pouch with Microshield and light blue, latex-free Nitrile gloves.

AE-5200 CPR Microshield™ in Vinyl Case, 10/box, \$75.00

ARMSTRONG

AE-5510 Microshield-*plus* CPR Barrier Device, 10/pkg., \$75.00

- CPR compatibility; does not interfere with CPR technique
- 36 square inches of face coverage
- 2 cm. tunnel with a one-way valve and a 3M Filtrete[™] filter
- For use with adults over 40 Kg. and children 10 Kg. 40 Kg.

Your Key To Safe CPR

CPR Microkey[™]

AE-5225 CPR Microkey, Blue Case, \$10.00

Carry CPR preparedness on your key chain with CPR Microkey. Each key ring comes with the popular Microshield (shown above). Compact and easy to use, the Microshield leaves CPR technique unchanged once the unit is in position. The mouthpiece/airway's one-way valve eliminates contact with the victim's secretions.

CPR Micromask

AE-5300 CPR Micromask, \$14.50 AE-5375 CPR Micromask with O₂ Inlet and Head Strap, \$17.00 AE-5305 Replacement Non-rebreathing Valve and Filter, \$4.85

- One-way, non-rebreathing valve
- 3M Filtrete™ Two-Way Filter helps to protect both patient and rescuer
- Large valve opening for maximum ventilation volume with minimal effort
- Latex-free, soft, blue nitrile gloves included
- Can be utilized with bag mask resuscitators
- Soft mask conforms to various facial features and provides an excellent seal
- Suitable for adults, children, or infants
- AE-5300 and AE-5375 both have adjustable cuff inflation for even better facial conformity

Prices and products are subject to change without notice.

Resuscitation Masks and Shields

Laerdal[™] Pocket Mask[™]

AE-5000 Pocket Mask with Filter and One-way Valve, \$16.00 AE-5075 Pocket Mask with Oxygen Inlet, Head Strap, Filter, and One-way Valve, \$22.00

- Includes blue, latex-free gloves and anti-microbial wipe
- Prevents mouth-to-mouth contact with the victim
- Transparent so rescuer can check victim's lip color and secretions
- Replaceable one-way valve and filter
- Oxygen inlet version facilitates delivery of supplemental oxygen
- 82 04 10 One-way Valve, \$8.00 82 06 10 Filter, \$2.50

Laerdal[™] Face Shield Key Ring

AE-5700 Face Shield Key Ring, \$5.52

A Resusci Patient Face Shield contained in an easy-to-carry key ring. The Face Shield can be used for mouth-to-mouth resuscitation on adults or children, or mouth-to-mouth/nose on infants.

- Helps overcome hesitation to start resuscitation
- Prevents direct contact with victim's mouth, nose, and face
- Plastic sheet and hydrophobic filter help prevent possible contact with victim's saliva or blood

AE-5700

Laerdal[™] Face Shield

46 00 00 Laerdal Face Shield, case is five boxes of 10 sealed wallet packs (50 total), \$108.00/case

Laerdal Face Shields are designed for protection in real-life rescue applications. They can be used for mouth-to-mouth resuscitation on adults or children, or mouth-to-mouth/nose on infants.

- Helps overcome hesitation to start resuscitation
- Prevents direct contact with victim's mouth, nose, and face
- Plastic sheet and hydrophobic filter help prevent possible contact with victim's saliva or blood
- Fits into wallets, pockets, handbags, and first aid kits
- Only 3³/4" x 2³/4" x ¹/16"

Laerdal[™] Pediatric Pocket Mask

AE-5100 Pediatric Pocket Mask with One-way Valve and Blue/Yellow Soft Pack, \$16.00

82 04 10 One-way Valve, \$8.00

Utilizing the same low-resistance one-way valve as the traditional Laerdal Pocket Mask (see above), in combination with a transparent soft silicone mask, The Laerdal Pediatric Pocket Mask is an excellent companion for the professional rescuer and first responder who have contact with infants and children. Includes blue, latex-free gloves and anti-microbial wipe.

Your opinion counts, let us hear from you at: csr@armstrongmedical.com

Hours: 8:00 - 4:30 CST*

PLACING YOUR ORDER

- When placing your order with us , please refer to your customer code number, which appears on all of our invoices and packing lists.
- Please write your customer code number on the outside of your catalog for immediate reference when placing phone orders.
- All federal government orders, other than credit card, must be in writing. Please fax your order to us or send in by mail. Thank you.
- Although they may not be listed individually, Customer Service can help you order special parts; please just ask.

TERMS OF SALE

- Net 30 days for regular customers with established credit.
- Visa, MasterCard, American Express, and Discover accepted.
- Orders paid by credit card may be subject to a 3% processing fee
- A service charge of \$20.00 will be added to orders under \$100.00.
- Service or handling charges are not refundable.
- Terms: payment in advance or net 30 days based upon credit approval.
- C.O.D. shipments are not available.
- Delinquent accounts assessed a finance charge equal to an annual rate of 18%.

CATALOG PRICING

- Prices do not include assembly
- Products are priced "each" unless otherwise noted.
- Our prices are as current as possible, but many of our suppliers issue price changes without notice. Therefore, all prices are subject to change without prior notice.
- When calling our Customer Service Department for any reason, please ask if your price listings are current. Since all catalogs will be numbered or dated, please refer to the date.
- This catalog is available free of charge to any qualified individual, organization, or institution.

SHIPPING TERMS

- Our standard shipping terms are prepaid and added to the invoice.
- In stock, small parcels are delivered within 7-10 days.
- Cart delivery time confirmed at the time of order.
- Standard shipping for small packages is FedEx® Ground. Expedited shipping is available for most items at an additional cost.

NATIONAL SALES FORCE

• Armstrong Medical Industries, Inc. supports our customers with a National Sales Force to assist with product demonstrations or any technical questions about our products. Please ask our Customer Service Department for the name of the representative in your area.

RETURNED GOODS

- All returned goods must have an authorization number assigned by our Customer Service Department. Returns must be within 30 days from date of original shipment.
- Please refer to your invoice number and customer code number when phoning in your request for returning merchandise.
- All returned goods must be sent prepaid. Any return that is not prepaid will be refused.
- Diagnostic, resuscitation equipment, sterilized items, non-stock items, customized orders, A-SMART[®] Carts, and supply carts are non-returnable. Our Customer Service Department will be glad to answer any questions you may have regarding returns.

RESTOCKING CHARGE

- A 15% restocking charge may be charged to your account for returned merchandise.
- An exception to this policy would be if we shipped incorrect merchandise. If this is the case, please call our Customer Service Department and report the incorrect shipment within 10 days. The same policy regarding an authorization number applies.

DAMAGED GOODS

- If you receive a small package that you believe is damaged, we ask that you call your delivery service for an inspection of the damaged articles.
- Please save all boxes and packing material to prove that the items were packed properly.
- All small parcel damage claims must be reported within 10 days after receipt of merchandise. All truck order damage claims must be reported within 7 days. All moving van damage claims must be noted at the time of delivery.
- Photos required for all damage claims of both packaging and product damage.
- If you receive a shipment via truck, inspect all cartons and note visible damage on Bill of Lading BEFORE SIGNING YOUR NAME.
- *When ordering, please remember that the lunch hours are always our busiest times. Thank you for your patience.
